

# Fact Sheet

## Bosch Secure Truck Parking

October 2016

**14,000**  
parking spaces are needed **everyday**.

**90,000** incidents of freight theft are committed every year against parked trucks across the EU<sup>1</sup>

is the estimated annual damage to the economy caused by freight theft<sup>2</sup>  
**€3 bn.** per year is the damage in Germany alone

**44**

fatal accidents a year involving dangerously parked trucks<sup>3</sup>

### Enhanced security in truck traffic

With Bosch Secure Truck Parking, parking spaces at truck stops can be conveniently reserved online and in advance. Company parking facilities will also be integrated into the new system, so that route and rest times may be planned more easily. Bosch also provides parking operators with additional surveillance by a Bosch Security Control Center, including virtual guard patrols.

- ▶ Freight operators, truck drivers and parking facilities will be networked
- ▶ Parking facilities will be equipped with video surveillance
- ▶ Accidents caused by dangerous parking will be reduced
- ▶ The first pilot facility was launched at the Bosch employee parking lot in Karlsruhe on the A5 motorway
- ▶ Secure Truck Parking will be formally launched in spring 2017

## BENEFITS

### For freight operators

- More secure planning means more on-time deliveries
- Enhanced cargo safety and lower insurance premiums
- Less time spent searching for parking spaces saves fuel
- Fewer violations of drivers' statutory driving and rest periods

### For truck stops

- Higher utilization of parking spaces
- Better sales and customer retention as coupons and food and drink vouchers are offered through the app

### For truck drivers

- Simple and convenient reservation of parking spaces via mobile app
- Fewer accidents caused by dangerous parking
- Security technology protects against crime

### For everyone

- Less searching for parking spaces means less congestion on freeways and at rest stops
- Lower carbon dioxide emissions
