

Bosch Smart Home Twist Remote Control

Next-level control

The Smart Home Remote Control Twist combines a mobile remote control with a wall-mounted switch in one device. Control all important functions of your Smart Home with the four buttons of the Twist unit or simple twisting motions. The energy-saving display is perfect to keep an eye on what's happening in your home. You can also set a code or twisting pattern to deactivate your alarm system. Simply enter the code when you enter your home – and your alarm turns off.

Features and advantages:

- **Convenient:** Control all important functions with a single device
- **Flexible:** Wireless wall bracket for easy access and great portability
- **Intuitive:** Simple, icon-based menu
- **Efficient:** Energy-saving display with high contrast for good readability and long battery life
