

Quick, easy and powerful sawing in house and garden: **New “NanoBlade” saw from Bosch for DIY enthusiasts** 18 volt cordless saw expands existing range

March 8, 2018
PI 10076 PT MS

- ▶ “NanoBlade” saw blade: Low vibrations, precise and maintenance-free
- ▶ AdvancedCut 18: Quick and powerful thanks to brushless motor
- ▶ Expansion of the “Power for All” battery system

“NanoBlade” saw blades stand for vibration-free, simple and precise sawing. Bosch is consistently pursuing technology that enables users to achieve exact cuts instantly and is expanding its [existing range of saws](#) with a new tool: the AdvancedCut 18 cordless saw with 18 volts for versatile and flexible applications. This means that DIY enthusiasts now have a choice of a total of four “NanoBlade” saws for nearly every application. Their shared advantage: “NanoBlade” technology is based on a saw blade with a revolving micro-chain, consisting of chain links that are only four millimeters in size. This means that the stroke movement that is typical of jigsaws and sabre saws, featuring high vibrations and saw blade running, is no longer required. The result is a saw which makes work particularly easy and precise and allows do-it-yourselfers to produce exact right angles.

One for all purposes: AdvancedCut 18 saws flexibly, quickly and powerfully

Cutting roof battens, shelves, beams or plastic tubes to length, trimming branches and sawing firewood to size: The AdvancedCut 18 all-purpose tool saws wood as well as plastics and composites particularly quickly and precisely with powerful 18 volts. For example, the saw can cut 250 roof battens of 24 x 48 millimeters to length – with just one charge of the 2.5 Ah battery. The tool’s design is well-balanced and particularly compact so that DIY enthusiasts can guide the cordless saw with just one hand and work comfortably, even on larger garden projects such as constructing sandboxes, flower boxes or rabbit hutches. This is enabled by the brushless motor. It occupies less space, has a longer lifetime and does not require any maintenance.

A system for combining tools: “Power for All” from Bosch

The AdvancedCut 18 is part of the “Power for All” battery system, which comprises DIY and garden tools. The same 18 volt lithium-ion battery can currently be used to operate more than 20 different power tools, from grass trimmers to rotary hammers. This enables do-it-yourselfers to do without batteries and chargers that they do not need, and they can save money at the same time. A “Power for All” logo on the packaging indicates which tools belong to the system.

The AdvancedCut 18 will be available from July 2018. The prices given are recommended retail prices including VAT. Subject to change.

Specifications	AdvancedCut 18
Battery voltage/capacity	18 V/2.5 Ah
No-load speed	0 – 7000 min ⁻¹
Max. cutting depth	65 mm
Dimensions without blade (length x height x width)	270 x 110 x 85 mm
Weight without/with battery	0.7/1.1 kg
Scope of delivery/recommended retail price including VAT	<ul style="list-style-type: none">• Individual tool without battery and charger: €159.99• Including 2.5 Ah battery and AL 1830 charger: €219.99 Each with “NanoBlade Speed 65 mm” saw blade, saw blade protection and hanger loop

Already available in the Bosch range:

- The EasyCut 12 cordless multi-saw
- The corded models EasyCut 50 and AdvancedCut 50

The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, power tool accessories and measuring tools. In 2017, its roughly 20,000 associates generated sales of 4.7 billion euros, about 85 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2018, Bosch Power Tools will again launch more than 100 new products onto the German market in its four business segments power tools, accessories, measuring tools and garden tools.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 400,500 associates worldwide (as of December 31, 2017). According to preliminary figures, the company generated sales of 78 billion euros in 2017. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT company, Bosch offers innovative solutions for smart homes, smart cities, connected mobility, and connected industry. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to create solutions for a connected life, and to improve quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiaries and regional companies in 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. At 125 locations across the globe, Bosch employs 62,500 associates in research and development.
