

Choose the perfect outfit for your robotic lawnmower: **Bosch Indego now with a personal touch** Huge selection of designs to create your unique look

August 29, 2018

PI 10753 PT MS

- ▶ Style as desired: Flags, animal and plant designs – there's something for everyone
- ▶ Select individually: Covers and skins on www.designmymower.com
- ▶ Customize your lawnmower: Upload your own image for maximum personalization

Put your personal stamp on the Bosch Indego, make it an eye-catcher with extravagant designs or adapt it to the style of your garden – from now on, almost anything is possible with the Indego models 350, 400, 350 Connect, 400 Connect as well as the Indego Garage. At www.designmymower.com, a huge range of high-quality covers (HydroGraphics) and self-adhesive vinyl films (Skins) are available to style-conscious garden lovers. Let yourself be inspired. Everything is included from classic designs such as daisies, pebbles and wood to country flags and abstract patterns, such as carbon, to exotic animal and plant designs. The Indego takes care of the lawn all by itself, it is clean and quiet – and now it has its very own style with your favorite design. This also applies to the Indego S+ from January.

Inspiration for a new look with a huge selection of designs

The new HydroGraphics covers, for example, give the Indego a particularly classy look while mowing. This printing process is used in the automotive sector and now also ensures high-quality surfaces that are built to last for the Indego – available in 17 unique designs. Those who fancy something exotic can bring a piece of the jungle or the steppe into the garden and let the Indego slip into the robe of peacocks, tortoises, zebras or leopards. Show your true colors with those of your country or your favorite flower. 35 different designs are available as self-adhesive and weather-resistant Skins made of vinyl film and can be applied simply and quickly. Depending on the selected design, your Indego may look its best with a pre-applied skin on a new black cover. This cover is simply clicked onto the Indego in place of the original cover – and the Indego mows in the desired look. Of course the robotic lawnmower's home can be restyled too: 39 tailored Skins are available for you to customize your Indego Garage the way you like it.

If that is not individual enough, you can now also upload your own image and decorate your Indego, including the Garage, with your favorite designs.

The HydroGraphics covers and Skins are available on www.designmymower.com, the page of a qualified Bosch partner. There, users will also find tips about how to apply the covers and skins quickly and easily.

If you have an Indego 350, 400, 350 Connect or 400 Connect, you have access to even more benefits: In addition to the new designs there is a free software update available (see PI 10752). The robotic lawnmowers thus offer even more functions. For example, the Connect models can be voice-controlled via Amazon Alexa for the first time.

Scope of delivery	Recommended retail price including VAT

The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, power tool accessories and measuring tools. In 2017, its roughly 20,000 associates generated sales of 4.7 billion euros, about 85 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2018, Bosch Power Tools will again launch more than 100 new products onto the German market in its four business segments power tools, accessories, measuring tools and garden tools.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 402,000 associates worldwide (as of December 31, 2017). The company generated sales of 78.1 billion euros in 2017. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT company, Bosch offers innovative solutions for smart homes, smart cities, connected mobility, and connected manufacturing. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to deliver innovations for a connected life. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. At 125 locations across the globe, Bosch employs some 64,500 associates in research and development.
