

### Long runtime, high flexibility thanks to 18 volt system: **New Bosch Connectivity floodlight for professionals** High IP protection for flexible use on the construction site

September 2018

PI 10767 PT MS

- ▶ Robust floodlight for the entire working day: GLI 18V-1200 C Professional
- ▶ Most powerful cordless floodlight in the range: GLI 18V-2200 C Professional
- ▶ Long runtime: Up to one working day without battery change
- ▶ High flexibility: Part of the 18 volt system with different battery sizes

Good lighting conditions at your fingertips – Bosch is further expanding their Connectivity system for professionals and, with the GLI 18V-1200 C Professional and GLI 18V-2200 C Professional, offering two new cordless floodlights with 1200 or 2200 lumens. Both tools can easily be controlled via app: Switching on and off, dimming, coupling multiple floodlights, activating the timer – all of this can be done with a simple tap of your finger. Furthermore, tradespeople can also check the battery's charging status or PIN the floodlights to control access. Further advantages are a long runtime and their high IP64 certification for dust and splash protection. The floodlights are therefore suitable for both indoor and outdoor applications.

#### **Robust floodlight for the entire working day: GLI 18V-1200 C Professional**

The GLI 18V-1200 C Professional, with twelve LEDs and lighting power of 1200 lumens, provides good visibility at any job site. At the same time, it stands out thanks to its particularly long runtime: 80 minutes per ampere-hour at the highest brightness setting. Using a 6.0 Ah battery, it will keep working for the entire working day. If the floodlight is switched on, it always starts in dimmed mode so that you are not dazzled by it. Furthermore, the GLI 18V-1200 C Professional is extremely robust: The surrounding frame guarantees a reduced wear-and-tear, reliably protects the light fixtures against damage and, at the same time, allows for five different set-up angles. The ¼ inch thread provides even more flexibility: The floodlight is therefore simply screwed onto a tripod and can then be positioned as required.

### **Most powerful cordless floodlight in the range: GLI 18V-2200 C Professional**

The GLI 18V-2200 C Professional stands out when compared to its predecessors thanks to a newly designed reflector. It increases the brightness from 1900 to 2200 lumens and makes the GLI 18V-2200 C Professional the most powerful cordless floodlight from Bosch. It efficiently illuminates even large work areas. The tool offers two brightness settings, five set-up angles and a 5/8 inch tripod thread. This means that tradespeople can quickly and flexibly, set and change the lighting conditions in various work situations. The runtime is 44 minutes per ampere-hour at the highest brightness setting, or 100 minutes when it is dimmed to 950 lumens. If you are using a 6.0 Ah battery, the GLI 18V-2200 C Professional will therefore light up the construction site at the required level of brightness for half a working day to the whole working day.

### **Full compatibility with the existing range**

The GLI 18V-1200 C Professional and GLI 18V-2200 C Professional are powered by high-performance 18 volt lithium-ion batteries which are part of Bosch's "Flexible Power System". This guarantees compatibility with all new and existing professional power tools and chargers within the same voltage class. This leads to greater productivity in day-to-day work.

The GLI 18V-1200 C Professional cordless floodlight is available from October, while the GLI 18V-2200 C Professional is available from September. These are the recommended retail prices excluding VAT. Subject to change.

<b>Specifications</b>	<b>GLI 18V-1200 C Professional</b>	<b>GLI 18-2200 C Professional</b> (replaces the GLI 18V-1900 C Professional)
Battery voltage	18 V	18 V
Luminous flux	1200 lumen	2200 lumen
Operating time at maximum light output	80 min/Ah	44 min/Ah
Connectivity function	Yes	Yes
IP64 certification	Yes	Yes
Dimensions (length x width x height)	217 x 133 x 215 mm	292 x 187 x 145 mm
Weight without battery	1.4 kg	1.9 kg
Scope of delivery/Recommended retail price excluding VAT	Tool in box without battery: €99	Tool in box without battery: €145

*The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, power tool accessories and measuring tools. In 2017, its roughly 20,000 associates generated sales of 4.7 billion euros, about 85 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2018, Bosch Power Tools will again launch more than 100 new products onto the German market in its four business segments power tools, accessories, measuring tools and garden tools.*

*The Bosch Group is a leading global supplier of technology and services. It employs roughly 402,000 associates worldwide (as of December 31, 2017). The company generated sales of 78.1 billion euros in 2017. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT company, Bosch offers innovative solutions for smart homes, smart cities, connected mobility, and connected manufacturing. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to deliver innovations for a connected life. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. At 125 locations across the globe, Bosch employs some 64,500 associates in research and development.*
