

Ergonomically optimized for best possible control:

May 2019

### **New Bosch direct driven random orbit sanders for pros** PI 10930 PT MS

#### **Fast removal rate with high surface quality**

- ▶ Rapid working: direct driven function for up to three times faster removal rate
- ▶ Controlled working: New shape with ergonomic palm rest and small grip circumference
- ▶ Virtually dust-free working: Multi-hole pad and sanding net for significantly less dust

Bosch expands its range with two new direct driven random orbit sanders: GET 55-125 Professional and GET 75-150 Professional. Both tools are equipped with a powerful 550 or 750 watts motor. They can thus achieve a fast removal rate with a high surface quality. Furthermore, with just one click, tradespeople can change from fine sanding to coarse sanding or polishing with the direct driven function – and thus achieve an up to three times faster material removal. A further advantage is easier handling thanks to the optimized design: The GET 55-125 Professional and GET 75-150 Professional are operated flexibly and comfortably in every application and position thanks to the ergonomically shaped palm rest with soft grip and narrow handle. It allows tradespeople from woodworking trades, as well as painters and (automotive)varnishers to achieve the best possible sanding and polishing results. If smaller, convex or concave surfaces have to be processed, the GET 55-125 Professional is recommended with a sanding pad diameter of 125 millimeters. The GET 75-150 Professional with a 150-millimeter pad is particularly suitable for larger surfaces. Both tools have a six-stage speed pre-selection and are designed for processing different surfaces.

#### **Efficient and virtually dust-free working with multi-hole pad and sanding net**

The GET 55-125 Professional and GET 75-150 Professional allow professionals to work very efficiently at low dust levels due to the multi-hole pad and the M480 sanding net – both included in the scope of delivery. In comparison to common six- to eight-hole standard pads, the multi-hole pad enables significantly better dust extraction. Furthermore, the multi-hole pad is compatible with all common abrasives: It is suitable for all hole patterns and velcro types. The M480 Net supports dust extraction across the entire surface thanks to an open net structure.

Clogging caused by residues and dusting of the workpiece or the environment are minimized, the lifetime of the abrasive is extended and a high removal rate is ensured. The system solution protects your health, saves time-consuming cleaning of the workplace and enhances the surface quality: Dust particles that could otherwise remain on the workpiece and scratch it are extracted efficiently.

The direct driven random orbit sanders are also equipped with an anti-static dust extractor, that makes it easier to guide a connected dust extractor, an auxiliary handle for the use on both sides as well as a removable guard attachment for protecting the sanding pad and workpiece during work close to edges.

The direct driven random orbit sanders GET 55-125 Professional and GET 75-150 Professional are available now. Accessories such as soft and hard sanding pads, polishing fleece and Click & Clean adapters for the connection of a dust extractor are available in the Bosch range of accessories. The prices given are recommended retail prices excluding VAT.

<b>Specifications</b>	<b>GET 55-125 Professional</b> (replaces GEX 150 Turbo Professional)	<b>GET 75-150 Professional</b> (replaces GEX 150 Turbo Professional)
Rated power input	550 W	750 W
Sanding pad diameter	125 mm	150 mm
No-load speed	3300 – 7800 rpm	3300 – 7300 rpm
Orbital stroke rate	6600 – 15,600 rpm	6600 – 14,600 rpm
Sanding pad speed	200 – 480 rpm	290 – 640 rpm
Eccentricity	3.5 mm	4.5 mm
Weight	2.4 kg	2.6 kg
Scope of delivery/ Recommended retail price excluding VAT	Multi-hole pad “medium”, M480 Net 120, antistatic dust extractor, removable guard attachment, auxiliary handle and hex key <ul style="list-style-type: none"> <li>• in a cardboard box: €398</li> <li>• in the L-Boxx including additional sanding net G80 and G180: €431</li> </ul>	Multi-hole pad “medium”, M480 Net 120, antistatic dust extractor, removable guard attachment, auxiliary handle and hex key <ul style="list-style-type: none"> <li>• in a cardboard box: €431</li> <li>• in the L-Boxx including additional sanding net G80 and G180: €460</li> </ul>

*The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, power tool accessories and measuring tools. In 2018, its roughly 20,000 associates generated sales of 4.6 billion euros, about 85 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2019, Bosch Power Tools will again launch more than 100 new products onto the German market in its four business segments power tools, accessories, measuring tools and garden tools.*

*The Bosch Group is a leading global supplier of technology and services. It employs roughly 410,000 associates worldwide (as of December 31, 2018). The company generated sales of 78.5 billion euros in 2018. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT company, Bosch offers innovative solutions for smart homes, smart cities, connected mobility, and connected manufacturing. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to deliver innovations for a connected life. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 460 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. At nearly 130 locations across the globe, Bosch employs some 68,700 associates in research and development.*
