

Optimized entry-level Multi-Tool: **The cordless Dremel Lite for controlled work** Better ergonomics based on user feedback

November 2019

PI 11027 PT MS

- ▶ Around 10 percent smaller and 35 percent more light-weight than the predecessor
- ▶ Easy to use due to single-button operation with sliding switch for speed adjustment
- ▶ Wide range of Dremel accessories for light-duty applications

Even more controlled sanding, grinding, sharpening, polishing, cleaning, engraving or carving than before – the optimized cordless Dremel Lite is now ready for all these tasks. The Multi-Tool has been improved compared to its predecessor Dremel 7750 based on feedback by 1,200 users and is characterized by advanced ergonomics and a particularly user-friendly and intuitive operating concept. With its compact design, a weight of only 270 grams and a comfortable soft grip at the handle points the Dremel Lite lies particularly comfortable in the hand. Both, novices as well as experienced users can work with it in a more controlled and precise way – especially in narrow or hard-to-reach areas. In addition, the one-button operation makes it easy to use and get started with versatile projects: The Dremel Lite can be conveniently switched on or off and the speed individually adjusted using a sliding switch on top of the tool. At speeds of 8,000 to 25,000 revolutions per minute, the cordless Multi-Tool works quickly and precisely on a wide range of materials, for example, wood, glass, metal, leather, stone or plastic. The Dremel Lite is suitable for do-it-yourself applications in the house, garden or workshop and for the realization of creative project ideas.

Simply versatile: Ideal for a variety of light-duty applications

No matter if you have to work in tight spaces – the cordless Multi-Tool is particularly versatile and compatible with a wide range of Dremel accessories for different light-duty applications. Its simple operating concept also includes a fast and tool-free accessory change thanks to the proven Dremel EZ Twist Nose Cap: You simply unscrew the nose cap, untighten the collet nut with an integrated wrench, change the accessories, tighten the collet nut and screw the cap on

again. The Dremel Lite draws its power for efficient indoor and outdoor applications from a 3.6 Volt lithium-ion battery with 2.0 Ah. It is equipped with a micro-USB charging cable to ensure that it can be used and charged anywhere easily and conveniently.

The Dremel Lite is available at retail outlets and will be supplemented by an extensive range of accessories for Multi-Tools. The prices are recommended retail prices including VAT.

Dremel is one of the leading providers of precision power tools for do-it-yourself experts and hobbyists. The brand aims to combine innovative tool solutions, functionality and sophisticated design. Dremel was founded by Albert J. Dremel in Wisconsin, USA, in 1932. Today, the company is part of the global Bosch Group. The company's products are available in more than 90 countries. Dremel's European head office is located in Breda, in the Netherlands.

Their product range includes compact tool systems (e.g. compact saws and glue guns), benchtop tool systems (e.g. scroll saws) and rotary tool systems (multitools). A wide range of accessories and attachments can be ordered to further enhance the versatility of the tools. The innovative 3D technology used in the Dremel 3D Idea Builders is another valuable addition to the product range.
