

Quietest hedgecutters on the market: **Extension of ProSilence range from Bosch** Efficient, comfortable hedge maintenance

March 2020

PI 11100 PT MS

- ▶ With 91 and 93 db the quietest corded hedgecutters on the market
- ▶ Excellent cutting performance and accurate results due to diamond-ground blades
- ▶ Low effort thanks to improved ergonomics
- ▶ Four corded models with blade lengths from 50 to 70 centimeters

High power at reduced volume – this is the principle behind the new generation of corded hedgecutters from Bosch. Thanks to ProSilence technology, which prevents indirect risk of injury by sound reduction, the new tools are the quietest corded hedgecutters on the market. The sound power level of the Universal models is 91 decibels and of the Advanced models 93 decibels – which means the new hedgecutters are 80 percent quieter than their predecessors. Users can choose from a total of four different models: The UniversalHedgeCut 50, UniversalHedgeCut 60, AdvancedHedgeCut 65 and AdvancedHedgeCut 70 offer blade lengths from 50 to 70 centimeters and tooth openings from 26 to 34 millimeters. From the housing to the motor and blade: All components have been optimized to make hedge maintenance as efficient, comfortable and quiet as possible. The result: clean cuts with less effort.

High operating comfort

Whether for small, middle or large hedges – the ProSilence hedgecutters fit perfectly to your hand, no matter the job, and provide a safe working. Thanks to their ergonomic design they are easy to operate: The user can comfortably grasp the handle and simply slide the hands along it to change position. It is not necessary to reach around. This enables users to trim and shape conifer, privet and laurel hedges of varying widths – comfortably and effortlessly. Work goes quickly, even when cutting woody hedges with thick branches. The UniversalHedgeCut 60, AdvancedHedgeCut 65 and AdvancedHedgeCut 70 models use a slipping clutch which allows the motor to rotate freely, without blocking blades, until the branch has been cut through. The integrated saw

function also guarantees fast cutting results: It enables branches thicker than the tooth opening of 26 or 34 millimeters to be cut in the front part of the blade. This is possible because some of the teeth are shorter in this section, ensuring the branch sits directly on the blade. Diamond-ground blades guarantee a perfect finish. The knife tip has a protector to prevent damage when cutting along walls and floors.

The new Bosch hedgecutters complete the ProSilence range, which already offers lawnmowers and blowers for quieter, more convenient gardening.

The new ProSilence hedgecutters are now available. All prices are recommended retail prices including VAT.

Specifications	UniversalHedgeCut 50 (replaces AHS 45-26)	UniversalHedgeCut 60 (replaces AHS 55-26)
Motor power	480 W	480 W

The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, power tool accessories and measuring tools. In 2018, its roughly 20,000 associates generated sales of 4.6 billion euros, about 85 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2019, Bosch Power Tools will again launch more than 100 new products onto the German market in its four business segments power tools, accessories, measuring tools and garden tools.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 403,000 associates worldwide (as of December 31, 2019). The company generated sales of 77,9 billion euros in 2019. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT company, Bosch offers innovative solutions for smart homes, smart cities, connected mobility, and connected manufacturing. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to deliver innovations for a connected life. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. At 125 locations across the globe, Bosch employs some 72,000 associates in research and development.
