

Expansion of the 18-volt “Power for All” system: **Bosch GardenPump 18 and AdvancedGrind 18** Battery technology for your home

April 2020

PI 11126 PT MS

- ▶ One battery for more than 30 DIY, garden and home appliances
- ▶ Save space, save money, protect the environment
- ▶ GardenPump 18: Comfortable and sustainable garden watering
- ▶ AdvancedGrind 18: Flexibility with maximum control and high user protection

Bosch offers DIY enthusiasts and hobby gardeners the widest application range on the market with the 18-volt “Power for All” battery system – it is the only system that combines DIY, garden and home appliances. With one and the same 18-volt battery you can operate more than 30 tools such as drills, grinders and angle grinders, jigsaws, hedgecutters, lawnmowers, mobile cleaner and vacuum cleaners – and now for the first time also a rainwater pump. DIY enthusiasts and hobby gardeners can therefore do without batteries and chargers they do not need, while saving them space and money with every further purchase at the same time.

First cordless rainwater pump from Bosch: GardenPump 18

Good for the environment and plants: With the first cordless rainwater pump from Bosch, garden enthusiasts can now say goodbye to energy and time-consuming labour with the watering can: Ideal for watering container grown plants, flowers and vegetables – everything can be supplied on a sustainable basis with water from the rain barrel. The GardenPump 18 is suitable for all common water tank models with a capacity up to 1 000 liters and has a suitable tap for standard garden hose couplings. It thus guarantees powerful flow and spray up to a range of 25 meters. Furthermore, the GardenPump 18 has sufficient power, for example, to water hanging baskets at heights of up to 2 meters or to clean garden furniture and paths. To use rainwater to maintain a healthy lawn the pump can be connected to a sprinkler or watering system. The GardenPump 18 also has an integrated anti-siphon connector: If the pump is stopped, it introduces air automatically into the connecting hose so that the water cannot flow out unintentionally. Your splash-proof battery control unit can either be installed on a suitable wall or

directly to the tank. The battery compartment is sealed with a watertight cover. Depending on the application and desired runtime, the GardenPump 18 can be operated with batteries from 2,0 to 6.0 Ah. One 2.5 Ah battery offers a runtime of 30 minutes. With a pump capacity of 11 liters per minute, it thus conveys 330 liters – more than an average tank filling volume of 250 liters. It is operated via the LED display on the control unit: Switching on and off, making the desired time setting or reading off the battery charge state – everything is easy and convenient.

Working with high user protection: AdvancedGrind 18

The 18-volt angle grinder AdvancedGrind 18 is ideal for grinding, cutting, brushing and polishing metal, stone, concrete and tiles thanks to its new design and powerful motor. It stands out among comparable competitor models by its soft-start function and its speed pre-selection. The soft-start function gradually increases the power of the angle grinder – it does not start immediately at full speed. This provides more comfort and control when working. The speed adapts itself electronically depending on the application and material. The disk stops within two seconds after the tool is switched off thanks to the integrated brake function. Its restart protection ensures that the angle grinder does not accidentally run on after a power failure. Another feature that makes work easier for DIY enthusiasts: A fast, easy and tool-free disc change in less than 12 seconds. The quick-change screw can be fixed at the touch of a button, allowing accessories to be quickly and easily loosened and reattached.

Both tools are available now. All prices are recommended retail prices including VAT.

Tool specifications	GardenPump 18
Battery voltage	18 V
Max. pressure capacity	2.0 bar
Max. flow volume	2,000 l/h
Max. immersion depth	1.8 m
Pump weight	0.8 kg
Weight of battery control unit without battery	0.6 kg
Splash water guard	IPX4
Scope of delivery/recommended retail price including VAT	<ul style="list-style-type: none"> • Tool including water filter, battery control unit, wall and tank fastening, connecting cable and hose, hose guide with anti-siphon connector (without battery and charger): 99.99 € • Tool including water filter, battery control unit, wall and tank fastening, connecting cable and hose, hose guide with anti-siphon connector, 2.5 Ah battery and charger AL 1810 CV: 149,99 €

Tool Specifications	AdvancedGrind 18
Battery voltage	18 V
No-load speed	2,800 – 11,500 rpm
Disk diameter	125 mm
Spindle	M14
Dimensions without battery (length x width x height)	315 x 228 x 103 mm
Weight without battery	1.7 kg
Scope of delivery/recommended retail price including VAT	Tool without battery and charger: 129.99 €

Subject to change.

The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, power tool accessories and measuring tools. In 2018, its roughly 20,000 associates generated sales of 4.6 billion euros, about 85 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2019, Bosch Power Tools will again launch more than 100 new products onto the German market in its four business segments power tools, accessories, measuring tools and garden tools.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 403,000 associates worldwide (as of December 31, 2019). According to preliminary figures, the company generated sales of 77.9 billion euros in 2019. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT company, Bosch offers innovative solutions for smart homes, smart cities, connected mobility, and connected manufacturing. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to deliver innovations for a connected life. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. At 125 locations across the globe, Bosch employs some 72,000 associates in research and development.
