

For versatile, fast cuts in wood and laminate:
New Bosch jigsaw blades with carbide technology
Extremely durable and robust for the toughest applications

June 2020

PI 11140 PT MR

- ▶ Service life in demanding materials up to 50 times longer
- ▶ Optimized saw blade design for fast, efficient cuts
- ▶ 75 years of Bosch jigsaw competencies for almost every application

Efficient accessories for the toughest applications: Bosch offers the most extensive carbide range on the market – and is now extending it with two new jigsaw blades for versatile, fast cuts in wood and laminated materials. The “Expert Hardwood fast” and the “Expert Laminate clean” achieve a previously unheard of service life with carbide types optimized to the application and a special welding technology: For applications in particularly hard, demanding materials, for example, cement-bound chipboard, they offer a service life up to 50 times longer than bimetal saw blades customary in the market. Professionals in woodworking trades are thus perfectly equipped for applications in various wood and synthetic materials – and with no more tedious saw blade changes.

Optimized saw blade design for fast, efficient cuts

Both jigsaw blades have an optimized design so that all sawing work can be carried out efficiently and quickly: With the “Expert Hardwood fast”, welded-on carbide teeth with an individual ground finish, a progressively increasing tooth pitch and an inclined blade shape achieve a more aggressive cut and thus rapid work progress – irrespective of the material thickness and hardness. Carpenters, joiners or patio builders can thus draw on a universal problem-solver for fast, coarse cuts. The “Expert Laminate clean” is available for interior fitting joiners and floor installers who have to make efficient cuts in different laminated materials. The jigsaw blade cuts without tears with precisely ground, counter-acting aligned teeth rows even in particularly hard laminate and floors subject to extremely high stress levels such as those used intensively in commercial areas. This includes, for example, High Pressure Laminate-boards, Trespa or glass-fibre reinforced vinyl.

75 years of Bosch jigsaw competencies for almost every application

The leading innovator for jigsaws and jigsaw accessories is writing history: The Bosch subsidiary Scintilla filed for the first patent in the world 75 years ago. Since then, Bosch has consistently developed the jigsaw. Craftspeople today can draw on a wide product range to saw quickly, powerfully, tidily and with a low level of tearing. Just as the first jigsaws, the first jigsaw blades also come from Switzerland – where they are still produced today. With more than 6.5 trillion jigsaw blades produced, Bosch has established a wide product range: Problem solvers for special applications are, for example, the “Clean for Plastic Composites” for plastic composites such as Trespa boards or “Endurance for Stainless Steel” for high-alloy steel. Furthermore, “Endurance for Fibre Plaster” can be used to efficiently process dry construction materials such as cement-bound fibre boards, or “Special for Ceramics” for ceramics, or “Clean for Carbon Fibre” for carbon fibres. Bosch rounds off the offer with jigsaw blades for a very wide variety of applications: Apart from the “Expert Hardwood fast” and the “Expert Laminate clean”, in the carbide range, for example, craftspeople can also use the “Progressor for Wood+Metal” for clean cuts in wood and metal composite materials.

The carbide jigsaw blades “Expert Hardwood fast” and “Expert Laminate clean” are suitable for all jigsaws with the T-shank holder. They are available with immediate effect in the specialized trade, also as an addition to the jigsaw sets “Wood” and “Wood & Metal”.

	Model	Length	Scope of delivery and price*
Expert Hardwood fast	T144DHM	100 mm	<ul style="list-style-type: none">• Pack of 3 27.17 €• In the “Wood” set including 9 x “Precision for Wood”, 5 x “Clean for HardWood”, 1 x “Expert Hardwood fast”: 43.11 €• In the “Wood & Metal” set including 6 x “Precision for Wood”, 5 x “Clean for HardWood”, 3 x “Speed for Metal” and 1 x “Expert Hardwood fast”: 41.61 €
Expert Laminate clean	T128BHM	92 mm	<ul style="list-style-type: none">• Pack of 3 30.57 €

The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, power tool accessories and measuring tools. In 2018, its roughly 20,000 associates generated sales of 4.6 billion euros, about 85 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2019, Bosch Power Tools will again launch more than 100 new products onto the German market in its four business segments power tools, accessories, measuring tools and garden tools.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 400,000 associates worldwide (as of December 31, 2019). The company generated sales of 77.7 billion euros in 2019. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. Bosch employs some 72,600 associates in research and development at 126 locations across the globe, as well as roughly 30,000 software engineers.
