

Clear storage of tools and accessories:

Bosch expanding SystemBox product range by size M Even better organization in a hobby cellar or a garage

December 2020

PI 11124 PT MR

- ▶ SystemBox size M in four set versions with focus on sanding and cutting
- ▶ All sizes stackable thanks to an integrated connection system
- ▶ Easy transport when connected due to a horizontal and a vertical handle

Everything you need in just one box – with the SystemBox from Bosch, do-it-yourselfers have their tools, accessories and any materials they need always ready at hand. The storage and transport system is now also available in size M for medium-sized to large tools including accessories. In the current size S there is still room for small to medium-sized power tools and the right accessories. The new SystemBox size M comes either empty or pre-equipped as a set version. Available are two sets of sanders and two sets of angle grinders. The matching accessory boxes are S and M size. They can be plugged into the SystemBox so that nothing slips and becomes mixed up. Another advantage compared with conventional transport cases: the SystemBoxes in sizes S and M can be stacked together in a space-saving way and easily transported when connected. The proven lid box fits both sizes. It is simply snapped on and provides quick access to flat work materials such as pencils and rulers. Its transparent lid provides do-it-yourselfers with a clear view to everything they need.

The SystemBox size M is available in the following four set versions:

Most versatile multi-sander from Bosch: PSM 200 AES in the SystemBox

The set with the PSM 200 AES in the new SystemBox size M contains everything you need for sanding – from applications on a large area through to fine detailed work. The powerful all-rounder features an iron-shaped sanding plate for work in more confined areas and a rectangular plate for bigger surfaces. The multi-sander is ideal for sanding wood, lacquered and painted surfaces, metal and stone. All 25 sanding papers contained in the set have grain size 80 and are always ready to hand in the attached accessory box.

Random orbital sander with high removal rate: PEX 300 AE in the SystemBox

The random orbital sander PEX 300 AE offers a high removal rate and is suitable for sanding and polishing flat and curved surfaces. The speed can be adjusted to the particular application and the material such as wood, plaster and painted or lacquered surfaces. The set in the SystemBox size M comprises a total of 25 sanding papers in grain sizes 80, 120 and 140, as well as two sanding plates of different hardness grades which are all well stowed in the supplied accessory box.

Most powerful angle grinder: PWS 850-125 in the SystemBox

Bosch will also offer the PWS 850-125 in the SystemBox size M. With a power output of 850 watts, it is the most powerful angle grinder in the DIY product range. It powerfully grinds, cuts and brushes metal, stone, concrete and tiles. Due to its light compact design, it is also extremely easy to use. The set includes one diamond cutting disc and one grinding disc each in the accessory box.

Cordless flexibility: AdvancedGrind 18 in the SystemBox

Anyone who prefers a cordless angle grinder can use the AdvancedGrind 18 with a diamond cutting disc. The tool is part of the Power for All Alliance: The supplied 18 V battery with 4,0 Ah will enable users to operate power tools, garden tools and home appliances from Bosch, as well as products bearing the Gardena, Emmaljunga, Gloria, Wagner and Rapid brand names (see [PI 11176](#)).

The SystemBox in size M, including set versions, are available right now. All stated prices are recommended retail prices including the current VAT rate.

The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, power tool accessories and measuring tools. In 2019, its roughly 20,000 associates generated sales of 4.8 billion euros, about 85 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2020, Bosch Power Tools will again launch more than 100 new products onto the German market in its four business segments power tools, accessories, measuring tools and garden tools.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 400,000 associates worldwide (as of December 31, 2019). The company generated sales of 77.7 billion euros in 2019. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is “Invented for life.” The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. Bosch employs some 72,600 associates in research and development at 126 locations across the globe, as well as roughly 30,000 software engineers.
