

### Powerful innovation in the '18V Power for All System': **Bosch UniversalPump 18V cordless pneumatic pump** Mobile compressor for tires, balls and much more

May 2022

PI 11486 PT MR

- ▶ High inflating performance for fast inflation
- ▶ Long hose for flexibility and convenience in every application
- ▶ Convenient storage of all valve adapters in the integrated accessory compartment
- ▶ One battery for many applications: Save space, save money, protect the environment

Whether you are traveling by car, bicycle, motorbike, or mobile home – with the new UniversalPump 18V cordless pneumatic pump from Bosch users can quickly and conveniently pump up their tires back to the required pressure. For example, even a deviation of just 20 percent in your car tires can considerably increase wear and fuel consumption, reduce the tires' runtime, and increase the risk of accident. The UniversalPump 18V provides a remedy here. In addition, it also pumps up balls and other small inflatable objects such as swimming rings quickly and easily. It is the first cordless pneumatic pump in the ['18V Power for All System'](#), which currently comprises more than 40 DIY, garden, and home appliances. In addition, it covers all representative tools per segment – and even extends beyond the Bosch range with additional partners in the cross-brand ['Power for All Alliance'](#). All tools – from rotary hammer to lawn mower and even vacuum cleaner – can be operated with the same 18V lithium-ion battery and only one charger. This saves users space and money and protects the environment. For anyone who prefers a handy device for on the go, the popular [EasyPump](#) is recommended: it fits in any sports or bicycle bag and in any glove compartment.

#### **High inflating performance for applications up to 10.3 bar**

The UniversalPump 18V offers a high inflating performance of 30 liters per minute. This will inflate a medium-sized car tire from 2.0 to 2.5 bar in just some 30 seconds. A single charge of a 2.5 Ah rechargeable battery could inflate 24 such car tires from 2.0 to 2.5 bar or 30 trekking bike tires from 0 to 4.5 bar. The maximum pressure of the UniversalPump 18V is 10.3 bar, 150 PSI and 1050 kPa, and is therefore also suitable for racing bike tires which require the

highest pressure at 8 bar and more. Thanks to a three-stage battery status indicator on the tool, users can always see the current charging level while using the pump.

### **High flexibility and convenience in use and storage**

The UniversalPump 18V is easy to handle. Its 67 cm long hose offers freedom of movement and ensures flexibility and convenience in every application. The tool is operated using an accelerator switch and the illuminated pressure gauge makes it easy to read the pressure in all lighting conditions. In addition, the pump's LED light ensures that valves can also be clearly seen in a dark environment, thus making it easier to connect them to the tool. All the necessary adapters can be found in the integrated accessory compartment at the front of the tool. Whether a ball needle, adapters for the French valves/Presta valves customary on racing bikes, or a volume adapter for a swim ring or a beach ball, everything has its place. The hose, which is textile-coated and therefore kink-proof, is wrapped around the tool. Thanks to this practical storage directly on the device, the compact cordless pneumatic pump can be safely stowed away in a space-saving manner at home, in the car or mobile home, where it is always at hand for the next job.

The UniversalPump 18V is available now. All prices are recommended retail prices including VAT.

<b>Tool specifications</b>	<b>UniversalPump 18V</b>
Battery voltage	18 V
Max. pressure	10.3 bar/150 PSI/1030 kPa
Air flow rate at 0 bar	30 l/min
Max. number of car tires per battery charge (from 2.0 to 2.5 bar, 205/55R16) / duration	24 / Ø 0:36 min per car tire
Max. number of bike tires per battery charge (from 0 to 4.5 bar, trekking bike, 28" x 1.5" wide) / duration	30 / Ø 0:30 min per bike tire
Max. number of balls per battery charge (from 0 to 0.8 bar, football size 5) / duration	55 / Ø 0:17 min per ball
Dimensions (length x width x height) / hose length	235 x 75 x 205 mm / 670 mm
Weight without battery	1.2 kg
Scope of delivery/recommended retail price including VAT	Tool in carton box including ball needle, adapter for French valve, and volume adapter (without battery and charger): €69.99

Subject to change.

*The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, garden tools, power tool accessories and measuring tools. In 2021, its roughly 21,000 associates generated sales of 5.8 billion euros, about 80 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2022, Bosch Power Tools will again launch more than 100 new products onto the market in its four business segments power tools, garden tools, accessories and measuring tools.*

*The Bosch Group is a leading global supplier of technology and services. It employs roughly 402,600 associates worldwide (as of December 31, 2021). The company generated sales of 78.7 billion euros in 2021. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in some 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. With its more than 400 locations worldwide, the Bosch Group has been carbon neutral since the first quarter of 2020. The basis for the company's future growth is its innovative strength. At 128 locations across the globe, Bosch employs some 76,100 associates in research and development, of which more than 38,000 are software engineers.*
