

### User-friendly office and on-site software for tradespeople: **OfficeOn from Bosch** Model all relevant processes quickly and clearly

August 2023  
PI 11701 PT MR

- ▶ Greater efficiency through centralized, digital administration of all key processes
- ▶ Flexible web-based application for in-office use and an app for working on site
- ▶ Cloud solution with no installation required, offering real-time synchronization

Less paper, faster processes in just a few clicks of the mouse and taps of the screen: OfficeOn, developed by Bosch especially for smaller trade businesses, is a simple and user-friendly solution for the centralized, digital management of all key company processes. The new cloud-based system reduces administrative workload significantly, is particularly easy to use, and is suited to any type of trade – from plumbing, heating, and electrical installation to carpenters, locksmiths, drywall contractors, painters, and decorators. OfficeOn aims to make office tasks like creating offers and invoices, coordinating schedules, documenting building sites, and time management as simple as possible for small businesses, so that tradespeople can concentrate on what they do best.

#### **Web-based application for in-office use, app when on site**

The user-friendly software focuses on and digitalizes all relevant processes, allowing them all to be managed centrally and clearly in a single system. OfficeOn includes a browser-based application for the office as well as an app for on-site staff, which are constantly synced up via the cloud in real time.

In the office, everything from project planning and creating offers and invoices to coordinating schedules and managing the customer base can be done in a flash and with ease using the web-based application. With OfficeOn, adding services and hourly rates for offers and invoice is simple. External services from wholesalers can also be imported in seconds thanks to the Datanorm and IDS connectivity. Not only that, the standard Datev interface also allows companies to submit information to tax advisors or tax authorities directly, saving both time and money.

The app has a number of features that are tailored to managing processes on site, including coordinating schedules and recording time worked with just a few clicks using the digital time sheets and work sheets. The documents can be countersigned directly by the customer thanks to the digital signing function, allowing businesses to meet their legal requirements with ease and efficiency.

#### **Cloud solution: no installation required**

The software is a cloud-based solution and does not require any installation. Data is synchronized in real time, permitting access around the clock from any device either in the office or on the road via the app. Key tasks such as regular backups, as well as software maintenance and updates, take place automatically in the cloud. No manual updates are necessary, reducing the administrative workload considerably.

#### **Flexible licensing options to meet all needs**

OfficeOn mobile and office licenses are available for 6, 12, or 24 months. Mobile licenses give employees smartphone app access to all the functions relevant to performing and documenting their work while on site. The office license is designed for office-based staff and allows functions like project planning, creating offers and invoices, and coordinating schedules to be used directly in a browser, without the need for any additional software. Office licenses automatically include one mobile license. Customers can choose to arrange installation and set-up assistance to help migrate data to the new software and import customer data, material lists, and service catalogs. Live chat and email support is included in all licenses. Additional premium hotline support is available as an optional extra. Because OfficeOn is part of the Bosch software suite, the same SingleKey ID login used for many other Bosch Group brands – including Bosch, Buderus, and Neff – can also be used to access the software.

OfficeOn is available starting in September. All prices are subject to VAT.

<b>Licensing term</b>	<b>6 months</b>	<b>12 months</b>	<b>24 months</b>
Office license, per month and user	€64.99	€59.99	€49.99

*The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, garden tools, power tool accessories and measuring tools. In 2022, its roughly 20,000 associates generated sales of 5.9 billion euros, about 90 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2023, Bosch Power Tools will again launch more than 100 new products onto the market in its four business segments power tools, garden tools, accessories and measuring tools.*

*The Bosch Group is a leading global supplier of technology and services. It employs roughly 421,000 associates worldwide (as of December 31, 2022). The company generated sales of 88.2 billion euros in 2022. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 470 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. With its more than 400 locations worldwide, the Bosch Group has been carbon neutral since the first quarter of 2020. The basis for the company's future growth is its innovative strength. At 136 locations across the globe, Bosch employs some 85,500 associates in research and development, of which nearly 44,000 are software engineers.*
