

Bosch eBike Systems expands digital theft protection for eBikes

New update turns Kiox displays into key

August 2023

- ▶ Kiox 300 and Kiox 500 as additional keys for the eBike
- ▶ The right screen for every ride: customisable Kiox 300 and Kiox 500

Stuttgart/Reutlingen - Experience trail adventures with an eMTB, discover new spots on eTrekking rides or cruise through the city to your favourite café on an eUrban bike: eBiking is fun and keeps you fit. To complement the riding fun with a carefree feeling when parking the eBike, Bosch eBike Systems is now expanding the digital theft protection in the smart system. The latest eBike Flow app update allows eBikers to use the Kiox 300 and Kiox 500 displays as a key to unlock their eBike in addition to their smartphone. Another new feature also gives them the option to disable automatic unlocking.

Flexible key options offer even more effective theft protection

All functions are based on the free [eBike Lock](#) theft protection. Once installed, this disables the motor support as soon as the eBike is switched off. In addition to the mechanical bicycle lock, eBike Lock provides additional security. Thanks to the update, this advantage can now also be used with the [Kiox 300 and Kiox 500](#). Once the eBike is switched on and the respective display connected, eBikers can easily define their preferred key in the settings of the eBike Flow app – either the smartphone, display or both. They can then simply lock and unlock the smart additional theft protection by removing the display from or inserting it into the mount.

The option of using Kiox 300 and Kiox 500 as a key also gives eBikers greater flexibility and convenience. If several people share an eBike, for example in the family or among friends, several digital keys can be defined and deleted again as necessary. The protection provided by eBike Lock is no longer tied to a single smartphone. Another new feature of the eBike Flow app prevents the eBike from being automatically unlocked as soon as it is within Bluetooth range of the smartphone. For this purpose, all users need to do is disable the "Automatic

unlock" function in the eBike Flow app. They can later enable the motor support of their eBike by pressing and holding the "Hold to unlock" button on the Home Screen of the eBike Flow app.

Most important functions in view thanks to customised display

Through linkage with eBike Lock, the range of functions of the Kiox 300 and Kiox 500 displays for the smart system has been increased even further. Users can now arrange the content and sequence of the display screens themselves and define up to three tiles on one screen and a maximum of 13 individual screens. Depending on their personal requirements, they have the option of displaying a total of up to 30 different items of information – for mountain bikers, e.g. the cadence, average and maximum speed, for touring bikers, e.g. the distance, gradient and range.

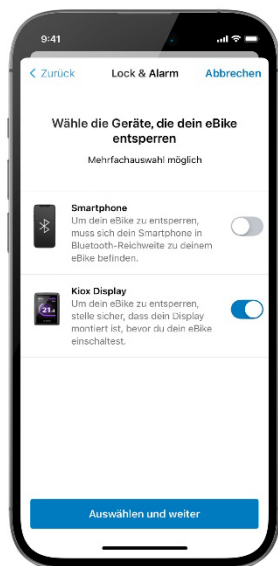

The update can be downloaded via the [eBike Flow app](#), which is available for download from the relevant app store at no additional cost.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 421,000 associates worldwide (as of December 31, 2022). The company generated sales of 88.2 billion euros in 2022. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 470 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. With its more than 400 locations worldwide, the Bosch Group has been carbon neutral since the first quarter of 2020. The basis for the company's future growth is its innovative strength. At 136 locations across the globe, Bosch employs some 85,500 associates in research and development, of which nearly 44,000 are software engineers.

The company was set up in Stuttgart in 1886 by Robert Bosch (1861–1942) as "Workshop for Precision Mechanics and Electrical Engineering." The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant upfront investments in the safeguarding of its future. Ninety-four percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The remaining shares are held by Robert Bosch GmbH and by a corporation owned by the Bosch family. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust.
