Sees Everything and Is Worth To Look At
The new Bosch Smart Home Eyes Outdoor Camera II

August 31st, 2023
PI 11702 HOME FB

- Smart 3D motion detection: The Eyes Outdoor Camera II uses intelligent video analysis to detect suspicious movements and persons.
- Innovative DualRadar technology: Two powerful sensors cover a total radius of 180° and activate the lighting when motion is detected.
- Integrated burglar alarm: a 75-decibel-loud siren with integrated red flashing lights ensures security.
- Award-winning design: A bright front light and integrated top and bottom lights in more than 1 500 colours make the Eyes Outdoor Camera II a stylish eye-catcher.
- Automatic storage: The 100 most recent video clips are saved free of charge for one week in the access-protected cloud.

Stuttgart – The new Bosch Smart Home Eyes Outdoor Camera II is more than just a high-precision security camera. Its stylish design with a bright front lamp and colour-customisable top and bottom lights also makes it a handsome eye-catcher outdoors. The integrated 75-decibel siren sounds a loud alarm to frighten burglars away. The Eyes Outdoor Camera II can be used independently with the Bosch Smart Home Camera app or integrated into the Bosch Smart Home system.*

Smart motion detection for enhanced security

Reliably protecting their own homes is the top priority for many people. With a 145° field of view, DualRadar sensors, and manually rotatable and tiltable camera head, the Eyes Outdoor Camera II provides ideal monitoring of the area under surveillance. Thanks to 3D motion detection and smart video analysis, the camera automatically distinguishes human movements from harmless motions such as a roving cat or a windblown branch. But if the device detects suspicious movements or people in the predefined area, it immediately notifies its user by sending a push message to their smartphone. The masking function blacks out predefined zones (for example, neighbouring properties) and excludes them from

the recording, thus protecting the privacy of third parties. The Eyes Outdoor Camera II easily masters darkness too thanks to its front lamp, which shines with a brightness up to 1 100 lumens, thus enabling the camera to also capture sharply focused images in full HD colour both day and night.

If motion is detected while the Eyes Outdoor Camera II is in security mode, the device shows another of its talents. In addition to high-precision video recording, its integrated 75-decibel siren sounds a loud alarm and its red upper and lower lights begin to flash, thus providing both audible and visual deterrence in emergencies.

Of course, when a stranger enters one's property, the person is not always a burglar. For example, the visitor could simply be a parcel carrier arriving at the door with a long-awaited delivery when no one is at home. In this case, the Eyes Outdoor Camera II acts like an intercom system. Via livestream on their smartphone, the user can see who is standing in front of the door and can communicate with them by means of the integrated loudspeaker and microphone. This makes it easy to instruct parcel carriers where they can safely leave their deliveries.

Brings light into the darkness

The integrated lighting options provide an additional sense of security. Using innovative DualRadar technology, the camera detects movements and measures distances with two modern radar sensors. It covers a field of vision of 180° and, as soon as suspicious movement is detected, it illuminates the property in the desired brightness. The property can initially be lit by subdued lighting or, as a deterrent, by bright lamps shining at full intensity. This way, passing cars or passers-by outside the monitored area do not trigger the motion light.

The Bosch Smart Camera app enables its user to adjust the brightness of the front lamp (from warm to cool white) as well as the top and bottom lights, which can optimally illuminate the property in more than 1 500 colours. All lamps can also be individually switched and used with automatic twilight or individual time settings.

Uncompromising design

Available in silver or anthracite metallic, the Eyes Outdoor Camera II convinces users thanks to its thoroughly stylish design, which earned it both the Red Dot "Best of Best" Design Award (2023) and the iF Design Award (2023). With its modern style and clever combination of a camera and outdoor lighting, it appealingly yet unobtrusively welcomes guests and residents alike.

Automatic storage

The 100 most recent video clips are automatically saved free of charge for seven days in the access-protected cloud storage. This enables users to re-evaluate or save individual video recordings. People who need even more storage space can opt for the Cloud+ extension, which lets them customise clip lengths, save video recordings for 30 days and permanently store up to 25 of their favourite clips. Particularly clever: the Cloud+ extension covers all cameras in the Bosch Smart Home system.

Even smarter in the system

The Eyes Outdoor Camera II can be integrated* into existing Bosch Smart Home systems to trigger smart automations and individual scenarios. For example, the customisable “Coming Home” scenario automatically deactivates the device when its user returns home after a day at work. Integrating the Eyes Outdoor Camera II into the Bosch Smart Home system enables the device to provide even greater security and convenience in one’s own home.

Further features

- Resolution: 1080-pixel full HD (1920 x 1080 pixels)
- Additional in-picture zoom
- IP protection class: IP 55
- Ambient temperature range: -20° to +50° Celsius
- Power supply: 230-volt alternating current
- Weight: 900 grams (including accessories and packaging: 1 448 grams)
- Monitored areas: 130° horizontal (+80° rotation), 70° vertical (+25° inclination), 145° diagonal
- Radar detection range: 180° (range of 10 metres)
- Connections: Wi-Fi IEEE 802.11 b/g/n 2.4 GHz

Availability

- The Eyes Outdoor Camera II is scheduled to become available at the beginning of 2024 in Germany, Austria, Switzerland, France, Great Britain, Belgium, the Netherlands, Luxembourg, Italy, Spain, Portugal, Denmark, Sweden, Norway and Finland.

Requirements

The Bosch Smart Camera app is required to use the Eyes Outdoor Camera II. To take advantage of further benefits, the Eyes Outdoor Camera II can be integrated into the Bosch Smart Home system via the Bosch Smart Home app.*

** Integration of the Eyes Outdoor Camera II into the Bosch Smart Home system is expected to become possible soon after the start of sales.*

Robert Bosch Smart Home GmbH was incorporated as a fully owned subsidiary of Robert Bosch GmbH. Headquartered in Stuttgart-Vaihingen, the company offers complete, intelligent consumer solutions for networked homes. Bosch Smart Home simplifies home life by controlling routine tasks in the background. It offers greater comfort, security and energy efficiency.

More information is available at www.bosch-smarthome.com

The Bosch Group is a leading global supplier of technology and services. It employs roughly 421,000 associates worldwide (as of December 31, 2022). The company generated sales of 88.2 billion euros in 2022. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 470 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. With its more than 400 locations worldwide, the Bosch Group has been carbon neutral since the first quarter of 2020. The basis for the company's future growth is its innovative strength. At 136 locations across the globe, Bosch employs some 85,500 associates in research and development, of which nearly 44,000 are software engineers.

The company was set up in Stuttgart in 1886 by Robert Bosch (1861–1942) as "Workshop for Precision Mechanics and Electrical Engineering." The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant upfront investments in the safeguarding of its future. Ninety-four percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The remaining shares are held by Robert Bosch GmbH and by a corporation owned by the Bosch family. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, an industrial trust. The entrepreneurial ownership functions are carried out by the trust.
