

Addition for AdvancedTrimRouter 18V-8 from Bosch: **New router plunge base for DIYers** Transforms cordless trim router to plunge router

September, 2023
PI 11718 PT MR

- ▶ Attachment for cordless trim router: effortless slot and pocket milling
- ▶ Precise depth adjustment: choose any standard cut with seven-step depth turret
- ▶ Simple guidance: compatible with Bosch guide rails and parallel guide
- ▶ Flexible change: cordless trim router and plunge router available as 2-in-1 set

The cordless [AdvancedTrimRouter 18V-8](#) from Bosch can now be turned into a cordless plunge router with ease thanks to a clever attachment. With the new router plunge base, DIYers can mill slots and pockets with even greater precision. The tool, which is part of the '[18 V Power for All System](#)' from Bosch, can therefore be used in an even greater variety of applications. The new router plunge base is available as a separate attachment for the AdvancedTrimRouter 18V-8 cordless trim router or as a 2-in-1 set comprising the AdvancedTrimRouter 18V-8, trim router base, and router plunge base as well as other helpful accessories.

Effortless precision milling

With the router plunge base, Bosch allows AdvancedTrimRouter 18V-8 users to plunge directly into the workpiece and mill slots and pockets with unrivalled accuracy. All conventional milling depths can be set quickly and easily by selecting one of the seven pre-set depths using the depth turret stop. No longer do DIYers have to waste time laboriously calculating depths of cut, as is the case on competitor models. Instead, they achieve the desired result in just a few steps. The additional variable depth fine adjustment makes for even more accurate milling results.

One tool, two attachments, countless applications

DIYers can easily switch between different jobs by detaching the trim router base on the AdvancedTrimRouter 18V-8 and fitting the router plunge base, turning the trim router into a fully functioning plunge router that is compatible with Bosch's guide rail system. Milling straight slots – like a juice groove on a home-made

cutting board, for instance – is an effortless process thanks to the parallel guide, which also comes with the attachment. Thanks to the ergonomic shape of the handles, the router sits comfortably in the hand and is simple to control. As with the trim router base, a vacuum cleaner can also be attached to the router plunge base, making creative tasks such as milling letters into a plank of wood or building furniture child's play, while keeping mess to a minimum too.

The router plunge base and the 2-in-1 router set are available now. Many different accessories, such as various router bit sets featuring groove, engraving, and round over bits, are also available in the Bosch accessories range. All stated prices are recommended retail prices including VAT.

Tool specifications	Router plunge base
Maximum stroke	45 mm
Weight (excluding tool and battery)	1.3 kg
Dimensions (excluding tool and battery)	256 x 120 x 209 mm
Delivery details/recommended retail price including VAT	Router plunge base in a box with guide holder, including guide rail adapter, dust adapter, centering pin: €59.99

Tool specifications	2-in-1 router set
Battery voltage	18 V
Collet size	6/8 mm
No-load speed	10,000 – 30,000 rpm
Trim router weight (excluding battery)	1.1 kg
Plunge router weight (including plunge base, excluding battery)	2.1 kg
Maximum trim/plunge router stroke	38/45 mm
Dimensions Trim/plunge router (including tool, excluding battery)	140 x 120 x 186 mm / 256 x 120 x 234 mm
Delivery details/recommended retail price including VAT	Set in SystemBox (M), consisting of AdvancedTrimRouter 18V-8, Router plunge base, guide holder incl. guide rail adapter, dust adapter (for router plunge base), dust adapter (for router trim base), centering pin, pilot guide, copy ring, wrench, collet (6 mm), collet (8 mm): €234.99

The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, garden tools, power tool accessories and measuring tools. In 2022, its roughly 20,000 associates generated sales of 5.9 billion euros, about 90 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2023, Bosch Power Tools will again launch more than 100 new products onto the market in its four business segments power tools, garden tools, accessories and measuring tools.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 421,000 associates worldwide (as of December 31, 2022). The company generated sales of 88.2 billion euros in 2022. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 470 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. With its more than 400 locations worldwide, the Bosch Group has been carbon neutral since the first quarter of 2020. The basis for the company's future growth is its innovative strength. At 136 locations across the globe, Bosch employs some 85,500 associates in research and development, of which nearly 44,000 are software engineers.
