

Addition to the '36V Power for All System': **New high-pressure washer from Bosch** Powerful helper for home and garden

February 2024
PI 11724 PT MR

- ▶ Powerful cleaning with low water consumption
- ▶ Trio nozzle and additional suction hose for various and flexible applications
- ▶ One battery for many applications: save space and money, protect the environment

This makes cleaning more fun: With the water-saving UniversalAquatak 36V-100 cordless high-pressure washer, cleaning patios or driveways can be done in no time. The garden tool is the latest addition to the ['36V Power for All System'](#) from Bosch. Just like all tools in the system – from lawnmowers through to leaf blowers – the washer can be operated with the same 36V lithium-ion battery and charger. This saves users space and money, and also protects the environment. What is more, the tool always offer optimum performance and maximum endurance for any project. The basis for this is an optimum coordination of key components such as the motor combined with an intelligent electronic control system called the 'Syneon Technology'. Only Bosch offers this interaction between the motor electronics and the battery.

High performance, optimized cleaning efficiency

The UniversalAquatak 36V-100 is the first cordless high-pressure washer from Bosch and has a maximum pressure of 100 bar, making it as powerful as a corded high-pressure washer and suitable for more demanding tasks. At the same time, it needs significantly less water for this than other high-pressure washers, since Bosch has optimized the hydraulic system to maximize water efficiency, achieving longer cleaning time with less water consumption. Extensive cleaning is also possible thanks to its long endurance. With a 4.0 Ah battery, the UniversalAquatak 36V-100 delivers up to 45 minutes runtime on one battery charge. Users can switch between two pressure modes: High mode effectively tackles stubborn dirt from stone terraces, for example. The low pressure provided by Eco mode gently yet thoroughly cleans surfaces such as wood terraces, thereby preserving the color of

the wood unlike conventional high-pressure washers. This versatility allows for careful cleaning of garden furniture, bicycles, cars, and more. And all this is not just possible at home.

Flexible use thanks to battery and separate suction hose

The long battery life makes the mobile high-pressure washer a reliable companion for use in a vacation house, on a pier, or anywhere with no power or water supply. Additionally, users can utilize alternative water sources by using a separately available suction hose, providing off-grid water supply from ponds or other containers. The Double Filtration System ensures the device is protected from dirt particles, increasing its overall lifespan. The Trio Nozzle offers three functions in one nozzle. It includes a fixed fan jet for light cleaning, a rotary jet for hard surfaces, and a pencil jet for tackling stubborn dirt. Thanks to its weight of 5.9 kg including battery, the UniversalAquatak 36V-100 is easy to transport and highly versatile. The gun and accessories can be stored directly on the tool, ensuring efficient organization and accessibility during use.

The UniversalAquatak 36V-100 cordless high-pressure washer is available as of now. All stated prices are recommended retail prices including VAT.

Tool specifications	UniversalAquatak 36V-100
Battery voltage	36 V
Maximum pressure	100 bar
Maximum flow rate	3.1 l/min
Number of pressure modes	2 (High + Eco)
Tool dimensions (length x width x height)	207 x 284 x 532 mm
Weight without/with battery (4.0 Ah)	4.6 kg / 5.9 kg
Scope of delivery/recommended retail price including VAT	<ul style="list-style-type: none">• Tool in a carton (without battery and charger): €239.99• Tool in a carton (without battery and charger) with suction hose: €259.99• Tool in a carton with 4.0 Ah battery and AL 36V-20 CV charger: €439.99

Subject to change.

The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, garden tools, power tool accessories and measuring tools. In 2022, its roughly 20,000 associates generated sales of 5.9 billion euros, about 90 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2024, Bosch Power Tools will again launch more than 100 new products onto the market in its four business segments power tools, garden tools, accessories and measuring tools.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 428,000 associates worldwide (as of December 31, 2023). According to preliminary figures, the company generated sales of 91.6 billion euros in 2023. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 470 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. At 136 locations across the globe, Bosch employs some 90,000 associates in research and development, of which roughly 48,000 are software engineers.
