

New tool for pet care:

### **Trim nails the gentle way with the new Dremel 7350-PET for easy, quiet, and smooth trimming**

December 2023

PI 11770 PT MR

- ▶ Low-stress care with reduced vibrations, quiet motor, and guard attachment
- ▶ Easy handling and complete control provided by constant speed of 12,000 rpm
- ▶ Cordless use thanks to 3.6-volt lithium-ion battery with USB charging cable

The cordless Dremel 7350-PET makes it easier to trim and care for the nails of cats and dogs, both at home and on the road. The compact and lightweight tool is ergonomically designed for an easy grip. Its low-vibration, quiet operation allows pet owners and specialists such as veterinarians, trainers, and groomers to care for animals with less stress. The new tool is tailored to the needs of dogs and cats and rounds out Dremel's pet grooming portfolio, which includes the [Dremel 7020-PET](#) as well as attachments for Dremel multi-tools.

#### **Low-stress care at 12,000 rpm**

Pets often do not have enough opportunities to grind down their nails through natural wear and tear. Scratching posts and walks on soft, grassy surfaces are usually not sufficient for doing so. As a result, nails should be trimmed if the need arises. A nail grinder like the Dremel 7350-PET, which was developed especially for pets, is suited for doing just that. The cordless pet grooming rotary tool provides a speed of 12,000 rpm, with sufficient grinding power and less than 55 dB of noise for gentle trimming. The constant speed enables precise trimming action and makes nail trimming less stressful for people and animals alike.

The tool comes with two grinding stones that are designed to last and provide gentle grinding. Another practical, safe feature is the transparent guard attachment, which helps maintain the optimal cutting angle of 45 degrees. Following the natural form and curve of a pet's nails reduces the risk of cutting them too short and prevents injury. Unlike a nail clipper, it trims the nail more evenly and smoothly to protect pet nails, as well as sensitive wooden floors or

carpets. In addition, the transparent safety guard catches nail dust and keeps fur protected from rotating parts.

### **Lightweight, handy, and always ready to use**

With a length of just 19 cm and a width of less than 4 cm, the Dremel fits in the hand with good balance and weighs just 249 g. The 3.6 V battery provides energy for roughly 80 minutes of light tasks such as nail care, giving the tool enough power for extended care sessions. A Micro USB cable for charging is included. The green LED indicator turns off once the battery is fully charged.

### **Polishing, engraving, carving: a real multifunctional tool**

Engineered with the needs of cats and dogs in mind, the Dremel 7350-PET is a multifunctional tool at heart. That makes it compatible with a wide range of additional accessories from Dremel. With the appropriate attachments, the tool is suited for light tasks such as polishing, engraving, and carving jobs. Cutting or drilling thin materials such as wood veneer is also possible.

The Dremel 7350-PET is available from February 2024 onwards. All stated prices are recommended retail prices including VAT.

<b>Tool specifications</b>	<b>Dremel 7350-PET</b>
