

New addition to the Professional 18V System: **Bosch cordless nail guns and cordless stapler for pros** Simple and precise fastening for interior finishing

March, 2024
PI 11805 PT MR

- ▶ Cordless operation offers greater flexibility than conventional pneumatic tools or gas-powered nail guns at comparable performance levels
- ▶ Gentle on your wrist thanks to low recoil
- ▶ Unique single-handed operation allows continuous working
- ▶ Multi-brand battery system saves time, space, and money

Bosch is expanding its range of 18V tools for carpentry and interior finishing with four cordless nail guns and a cordless stapler for simple and precise fastening. The cordless nail guns vary in terms of the compatible nail types, with nail sizes of 1.2 to 1.8 mm (18ga to 15ga) available, as well as lengths of between 16 and 64 mm. The cordless stapler uses 1.2 mm (18ga) staples with a crown of 5.8 mm and a length of between 9.5 and 38 mm. All five cordless tools operate with a long-lasting brushless motor. Bosch recommends a ProCore18V battery with 4.0 Ah capacity for convenient and efficient working. The cordless system offers professionals greater flexibility than conventional pneumatic tools or gas-powered nail guns at comparable performance levels. Thanks to the specially designed triggering mechanism with a flywheel drive, these tools have significantly lower recoil than compressed-air nail guns. This protects users' wrists and the tool itself from damage. The [Professional 18V System](#) covers all major 18V applications and even works with brands beyond Bosch, with additional partners in the multi-brand [AmpShare battery alliance](#). All tools – from compact drill drivers to miter saws – can run on the same 18V lithium-ion battery and charger, thus saving tradespeople time, space, and money.

Full application range from robust fastenings to delicate upholstery work

The new range of tools offers professional tradespeople exactly what they need whatever the task at hand – whether it is maximum holding power or a minimum visible nail hole. The GNH 18V-64 MD Professional nail gun uses 1.8 mm (15ga) D-head nails with a length of 32 to 64 mm. It offers the highest

fastening power in the range and is perfect for fixing window frames or door jambs. With a nail size of 1.6 mm (16ga) and the same 32 to 64 mm length, the GNH 18V-64-2 Professional and the GNH 18V-64-2 M Professional are the tools of choice for tasks such as attaching window and door casings. The GNH 18V-64-2 Professional features single firing, whereas the GNH 18V-64-2 M Professional offers both single and contact firing modes. The GNH 18V-50 M Professional model with its slim, 1.2 mm (18ga) nails with lengths of between 16 and 54 mm leaves barely visible nail holes on the workpiece, making it ideal for furniture-building or fastening baseboards. As the first cordless stapler in the [Professional 18V System](#), the GTH 18V-38 M Professional can handle tricky tasks such as the precision fastening of tongue-and-groove wall and ceiling paneling or upholstery work with ease.

Unique single-handed operation and further benefits

All five tools feature a thumb-actuated power switch, convenient for right and left hand users – eliminating the need for a second free hand. This single-handed operation makes the range unique on the market and allows tradespeople to work continuously without interruption. Another benefit over compressed-air tools is that the countersink depth can be quickly and accurately adjusted using the thumbwheel on the side of the tool and is displayed conveniently in a viewing window. With the contact point clearly visible, nails and staples can be fastened with the utmost precision. Shortly before the magazine is empty, the dry-fire lock-out ensures that the workpiece isn't damaged through blank firing. The tools also feature two bright LEDs to make sure that the workspace is always well illuminated. Users can switch between single firing and contact firing modes on the integrated control panel, which facilitates series applications. The service indicator lets users know when the tool requires maintenance.

The new cordless nail guns and cordless stapler are available starting in May. All prices are recommended retail prices and do not include VAT. Certified nails and additional accessories are available from the Bosch accessory range.

Tool specifications	GNH 18V-64-2 Professional	GNH 18V-64-2 M Professional
Battery voltage	18 V	18 V
Nail size	1.6 mm (16ga)	1.6 mm (16ga)
Nail length	32 – 64 mm	32 – 64 mm
Magazine angle	20°	20°
Activation modes	Single	Single/contact
Additional features	Integrated control panel with service indicator, precision depth adjustment, dry-fire lockout, two LEDs	Integrated control panel with service indicator, precision depth adjustment, dry-fire lockout, two LEDs

The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, garden tools, power tool accessories and measuring tools. In 2022, its roughly 20,000 associates generated sales of 5.9 billion euros, about 90 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2024, Bosch Power Tools will again launch more than 100 new products onto the market in its four business segments power tools, garden tools, accessories and measuring tools.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 428,000 associates worldwide (as of December 31, 2023). According to preliminary figures, the company generated sales of 91.6 billion euros in 2023. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 470 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. At 136 locations across the globe, Bosch employs some 90,000 associates in research and development, of which roughly 48,000 are software engineers.
