

### Additions to the '18V Power for All System' from Bosch: **Cordless paint spray systems with AllPaint technology** Even application of paint, lacquers, and varnishes

April 2024

PI 11816 PT MR

- ▶ UniversalSpray 18V-300 and AdvancedSpray 18V-500 round out cordless paint spray system range for DIYers
- ▶ AllPaint technology: one nozzle for paint, lacquers, and varnishes
- ▶ Smooth finish and longer runtime thanks to brushless motor and 'Syneon Technology'
- ▶ One battery for many applications: save space and money, protect the environment

Bosch has rounded out its range of cordless paint spray systems for DIYers with two new tools. The UniversalSpray 18V-300 and the AdvancedSpray 18V-500 make it possible to apply all types of paint, lacquer, and varnish evenly to walls and furniture. Unlike the [EasySpray 18V-100](#), which is already available, these new tools are also compatible with wall paints. The tools are part of the '[18V Power for All System](#),' which covers all representative tools in each segment, currently comprises about 70 DIY tools, gardening tools, and home appliances, and even extends beyond the Bosch range with additional partners in the cross-brand '[Power for All Alliance](#).' All tools – from rotary hammer to lawn mower and even vacuum cleaner – can be operated with the same 18V lithium-ion battery and only one charger. This saves users space and money and protects the environment.

#### **Air volume adjustment and ergonomic design for effortless spraying**

With their AllPaint technology, the UniversalSpray 18V-300 and AdvancedSpray 18V-500 offer one key advantage over their competitors. As a result, all sorts of coatings can be applied with just one nozzle and without requiring any accessories. The individual air volume adjustment allows DIYers to apply lacquers, varnishes, and wall paints with ease. Higher air speeds are required for wall paints, while lower speeds are sufficient to apply even coats of varnish. Thanks to their brushless motors, both tools offer high motor and air speeds, making for smooth and even coatings, even with wall paints. Not only that, but the sprayers also have longer runtimes and provide the same level of

performance regardless of the level of charge. This is thanks to the optimum coordination of all key components, such as the motor and air routing, combined with an intelligent electronic control system called 'Syneon Technology.'

Only Bosch offers this interaction between motor electronics and battery. The ergonomic design makes spraying paints simple. The spray lever is located close to the handle, meaning that users can easily trigger and control how much paint is being applied with precision – including when working overhead. The sprayer unit and the motor can be disconnected at the touch of a button, making cleaning the tools a breeze.

### **UniversalSpray 18V-300: straightforward allrounder**

One of the main advantages of the UniversalSpray 18V-300 is its ease of use. DIYers can switch between two air flow settings, which ensure that the right amount of paint is being sprayed depending on the viscosity of the material – providing a perfectly smooth finish. While thinner coatings such as wood varnishes require less volume to prevent the liquid from running, wall paints have to be applied at a higher level of performance and throughput. The UniversalSpray 18V-300 is perfect for medium-sized painting projects such as garden sheds or furniture.

### **AdvancedSpray 18V-500: even coats thanks to fine spraying**

DIYers who want to achieve a particularly smooth finish and even paint application can turn to the AdvancedSpray 18V-500 with its patented AirBoost technology. The accelerated airflow allows the tool to spray particularly fine coats. What is more, the AdvancedSpray 18V-500 also features fully adjustable airflow settings, which enable the user to set exactly the right speed for the paint type. The tool comes with two attachable air caps: a black one for faster work progress and a white one that ensures an even finer finish. The AdvancedSpray 18V-500 is ideal for larger paint-spraying projects such as room walls.

<b>Tool specifications</b>	<b>UniversalSpray 18V-300</b>	<b>AdvancedSpray 18V-500</b>
Battery voltage	18 V	18 V
Feed volume	0 – 300 ml/min	0 – 500 ml/min
Paint application	2 m <sup>2</sup> /min	3 m <sup>2</sup> /min
Container volume	1,200 ml	1,200 ml
Sprayer dimensions including container and battery (length x width x height)	317 x 131 x 308 mm	317 x 131 x 308 mm
Weight with 4.0 Ah battery, without paint	1.7 kg	1.7 kg
Scope of delivery/ recommended retail prices including VAT	<ul style="list-style-type: none"> <li>• Tool in a carton with cleaning brush and measuring cup (without battery and charger): €149.99</li> </ul>	<ul style="list-style-type: none"> <li>• Tool in a carton with cleaning brush, measuring cup, fine spray air cap, additional paint container with lid (without battery and charger): €179.99</li> <li>• Tool in a carton with cleaning brush, measuring cup, fine spray air cap, additional paint container with lid, battery (4.0 Ah) and charger (AL 18V-20): €239.99</li> </ul>

*The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, garden tools, power tool accessories and measuring tools. In 2023, its roughly 19,500 associates generated sales of 5.6 billion euros, about 90 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2024, Bosch Power Tools will again launch more than 100 new products onto the market in its four business segments power tools, garden tools, accessories and measuring tools.*

*The Bosch Group is a leading global supplier of technology and services. It employs roughly 428,000 associates worldwide (as of December 31, 2023). According to preliminary figures, the company generated sales of 91.6 billion euros in 2023. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and*

*its roughly 470 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. At 136 locations across the globe, Bosch employs some 90,000 associates in research and development, of which roughly 48,000 are software engineers.*
