

### Security and Convenience Combined

#### The new Motion Detector II [+M] with integrated orientation light and flexible operation

2 September 2025

PI 12003

- ▶ Precise motion detection with a detection range of up to 13 meters and a filter for small animals up to 80 cm in height prevent false alarms.
- ▶ The integrated orientation light automatically switches on when motion is detected and in low ambient light – for greater security in the dark.
- ▶ Thanks to its IP55 protection rating, the motion detector is weatherproof and can be used flexibly both indoors and outdoors.
- ▶ Compatibility with Matter enables it to be used in both the Bosch Smart Home system and Matter systems – future-proof and maximally flexible.

Stuttgart – Bosch Smart Home is expanding its portfolio with the new Motion Detector II [+M], which offers an innovative combination of security and convenience. With precise motion detection, integrated orientation light and flexible operation in the Bosch Smart Home system or Matter systems\*, the Motion Detector II [+M] combines state-of-the-art technology and minimalist design. Its versatility and ease of installation make it the ideal addition to any smart home.

#### Reliable technology for the utmost security

With a detection range of up to 13 meters and EN Grade 2 certification, the Motion Detector II [+M] upholds professional security standards. In an emergency, the device – as part of the Bosch Smart Home alarm system – triggers an on-site alarm in the event of unwanted movement, while users receive a push notification on their smartphone to validate the alarm (via a live camera image\*\*). The integrated filter for small animals minimizes false alarms triggered by pets with heights up to 80 cm. In addition, the demolition alarm ensures that tampering attempts are immediately detected and reported.

#### Orientation light and convenient light control

The integrated orientation light automatically switches itself on when motion is detected and ambient brightness is low, providing increased security and better

orientation in dark conditions. The light sensitivity and intensity can be individually adjusted to optimise everyday convenience. Additionally, the orientation light can serve as a subtle status indicator for an activated alarm system – ideal for avoiding false alarms. Furthermore, the Motion Detector II [+M] can activate smart lights when motion is detected and automatically control the lighting depending on the ambient brightness.

### **Modern design for indoor and outdoor areas**

Modern and unobtrusive design enable the Motion Detector II [+M] to blend harmoniously into any home. Its IP55 protection rating certifies that it is also suitable for outdoor use and can withstand adverse weather conditions. Easy installation with screws or the included adhesive, as well as flexible positioning in corners, on walls or freestanding, make installation particularly simple.

### **Additional functions and automations**

The Motion Detector II [+M] is particularly impressive thanks to its clever additional features: Integrated sensors for temperature, vibration and brightness support smart automations or scenarios – for example, for lighting, heating or shading. The flashlight function enables users to activate the orientation light at the touch of a button. Thanks to its compatibility with the Matter standard, the Motion Detector II [+M] can be integrated not only into a Bosch Smart Home system, but also directly into a Matter system.

### **Availability and price**

The new Motion Detector II [+M] is available now for €49.95 including 19% VAT.

\*Features offered in the Matter system depend on the respective provider.

\*\*Requires an Eyes Indoor Camera II

*The Bosch Group is a leading global supplier of technology and services. It employs roughly 417,900 associates worldwide (as of December 31, 2024). According to preliminary figures, the company generated sales of 90.5 billion euros in 2024. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. With its business activities, the company aims to use technology to help shape universal trends such as*

automation, electrification, digitalization, connectivity, and an orientation to sustainability. In this context, Bosch's broad diversification across regions and industries strengthens its innovativeness and robustness. Bosch uses its proven expertise in sensor technology, software, and services to offer customers cross-domain solutions from a single source. It also applies its expertise in connectivity and artificial intelligence in order to develop and manufacture user-friendly, sustainable products. With technology that is "Invented for life," Bosch wants to help improve quality of life and conserve natural resources. The Bosch Group comprises Robert Bosch GmbH and its roughly 470 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. Bosch's innovative strength is key to the company's further development. At 136 locations across the globe, Bosch employs some 86,900 associates in research and development, of which nearly 48,000 are software engineers.

The company was set up in Stuttgart in 1886 by Robert Bosch (1861–1942) as "Workshop for Precision Mechanics and Electrical Engineering." The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant upfront investments in the safeguarding of its future. Ninety-four percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The remaining shares are held by Robert Bosch GmbH and by a corporation owned by the Bosch family.

The majority of voting rights are held by Robert Bosch Industrietreuhand KG. It is entrusted with the task of safeguarding the company's long-term existence and in particular its financial independence – in line with the mission handed down in the will of the company's founder, Robert Bosch.
