

Raising Security to a New Level

The New Bosch Smart Home Products at IFA 2025

3 Sept. 2025

PI 11999

- ▶ The Bosch Smart Home alarm system raises security to new heights with innovative additions to the portfolio of products and services.
- ▶ The new Motion Detector II [+M] combines security and convenience with precise motion detection and integrated orientation light.
- ▶ The new Security+ service offers all-round security thanks to 24/7 emergency assistance – even if its owner cannot be reached in an emergency.
- ▶ The optional Home+ upgrade enables users to centrally control up to three Bosch Smart Home systems via a single app.

Stuttgart – At IFA 2025, Bosch Smart Home is once again demonstrating that its products and solutions are impressive thanks not only to their first-class quality, but also to innovation. With the expansion of its product and service portfolio to include the new Motion Detector II [+M], Security+ and Home+, the award-winning alarm system is being raised to a new level.

The utmost security via reliable technology: the Motion Detector II [+M]

The new Motion Detector II [+M] offers an innovative combination of security and convenience. Thanks to precise motion detection with a detection range of up to 13 meters, an integrated orientation light and flexible operation in the Bosch Smart Home system or Matter systems*, the Motion Detector II [+M] combines state-of-the-art technology and minimalist design. In an emergency, the device – as part of the Bosch Smart Home alarm system – triggers an on-site alarm in the event of undesired movement; at the same time, users receive a push notification on their smartphone to validate the alarm (via a live camera image**). The integrated filter for small animals minimizes false alarms caused by pets up to 80 cm in height. Furthermore, the demolition alarm ensures that tampering attempts are immediately detected and reported.

Comprehensive security through 24/7 emergency assistance: Security+

Security+ provides a professional 24/7 emergency call centre that can intervene immediately in the event of an alarm. If an alarm is displayed in the Bosch Smart Home app and the users do not respond, Security+ is activated and the emergency call centre tries to reach the users by phone. If they cannot be reached, the call centre gets in touch with designated emergency contacts. These trusted contact persons assess the situation – on-site if necessary. If no further assistance is required, the alarm is discontinued and the case is closed. Otherwise, the emergency call centre immediately coordinates additional activities and notifies the police or fire department to minimize damage. Thanks to direct connection to the appropriate emergency services, the emergency call centre can mobilize assistance immediately: this is crucial in the event of a burglary, a fire or a water leak. Individualized emergency plans enable users to specify their preferences for emergency contacts and alarm sequences. Security+ also includes additional camera features with intelligent audio analysis: this enables the indoor cameras to detect specific sound patterns such as broken glass or the shrill alarms of smoke and carbon monoxide detectors. Security+ also provides 30 days of cloud storage of up to 400 clips with individually selectable clip lengths.

Additional security in up to three Bosch Smart Home systems: Home+

The new, optional Home+ upgrade enables users to centrally control up to three Bosch Smart Home systems via a single app. Multisystem control ensures that users always have an overview of their home – whether at their primary residence, vacation home or second home – or to assist family members with operating the app and devices. The alarm system activated in all Bosch Smart Home systems immediately alerts users in the event of a break-in, the presence of smoke or water leaks, thus enabling them to respond quickly – even when no one is at home. At the same time, smart remote control of heating and lighting efficiently reduces energy consumption and the associated expenses. Home+ thus makes it possible for users to enjoy the benefits of the Bosch Smart Home system beyond the confines of their own four walls. Home+ also provides intelligent audio analysis and extended cloud storage. As a 3-in-1 package, it further enhances its user's quality of life.

Availability and prices

The new Motion Detector II [+M] is available immediately for €49.95 including 19% VAT. Security+ is immediately available in the Bosch Smart Home app for a monthly fee of €29.99 including 19% VAT. Home+ can be added to the Bosch Smart Home app for €4.99 per month starting at the end of 2025.

*Features offered in the Matter system depend on the respective provider.

**Requires the Eyes Indoor Camera II.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 417,900 associates worldwide (as of December 31, 2024). According to preliminary figures, the company generated sales of 90.5 billion euros in 2024. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. With its business activities, the company aims to use technology to help shape universal trends such as automation, electrification, digitalization, connectivity, and an orientation to sustainability. In this context, Bosch's broad diversification across regions and industries strengthens its innovativeness and robustness. Bosch uses its proven expertise in sensor technology, software, and services to offer customers cross-domain solutions from a single source. It also applies its expertise in connectivity and artificial intelligence in order to develop and manufacture user-friendly, sustainable products. With technology that is "Invented for life," Bosch wants to help improve quality of life and conserve natural resources. The Bosch Group comprises Robert Bosch GmbH and its roughly 470 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. Bosch's innovative strength is key to the company's further development. At 136 locations across the globe, Bosch employs some 86,900 associates in research and development, of which nearly 48,000 are software engineers.

The company was set up in Stuttgart in 1886 by Robert Bosch (1861–1942) as "Workshop for Precision Mechanics and Electrical Engineering." The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant upfront investments in the safeguarding of its future. Ninety-four percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The remaining shares are held by Robert Bosch GmbH and by a corporation owned by the Bosch family. The majority of voting rights are held by Robert Bosch Industrietreuhand KG. It is entrusted with the task of safeguarding the company's long-term existence and in particular its financial independence – in line with the mission handed down in the will of the company's founder, Robert Bosch.
