

### **Bosch expands aftermarket portfolio with key chassis components**

February 2026

PI 12051 MA

Extensive range of control arms as well as stabilizer links and tie rods coming March 2026

- ▶ Bosch transfers its original equipment expertise in steering, vehicle motion and brakes to chassis components
- ▶ Advanced quality tests ensure high safety standards and durability
- ▶ Comprehensive portfolio focuses on current market requirements and offers a six-year warranty\*

Karlsruhe, Germany – Bosch is expanding its already extensive range for the aftermarket. Starting in March 2026, the company will also be offering a broad portfolio of chassis components such as control arms, stabilizer links, and tie rods. Already from the time of the market launch the range will cover spare parts for around 80 percent of all vehicles on the German market. The portfolio will be continuously expanded throughout 2026. In this new product area, customers will benefit from the company's many years of original equipment expertise in steering, vehicle motion and brakes, which is being transferred to the chassis portfolio.

#### **High market relevance and growing demand**

This portfolio expansion is highly significant: during general vehicle inspections, defects in chassis components are one of the most common reasons that older vehicles fail the MOT-test. In electric vehicles, higher vehicle weights and higher acceleration forces lead to increased wear. As a result, the importance of chassis repairs for workshop will continue to grow. With this portfolio expansion, Bosch is responding specifically to this need and offering workshops a high-quality product selection.

### **Quality, original equipment standards, and sustainability**

The new range meets particularly stringent quality and safety standards. Bosch chassis components undergo stricter and more extensive approval tests than customary in the market. The company underlines this clear commitment to quality and durability with an extended warranty of six years.\* To enable workshops to install them quickly and efficiently, all Bosch chassis components come with the necessary accessories such as nuts, bolts, and washers. The secured fit at original-equipment level also ensures efficiency in day-to-day workshop operations.

Bosch's new portfolio covers all relevant original-equipment trends in the aftermarket. These include lightweight components that have been developed specifically for use in electric vehicles, as well as hydraulic bushings that enable a high level of driving comfort, particularly in demanding applications. In the interests of sustainability, Bosch also offers ball joints and bushings separately so that it's not always necessary to replace the entire control arm.

The new product range will be launched in Germany, Austria and Suisse in March 2026, followed by a gradual rollout across the rest of Europe, starting with France, Poland, and Türkiye. Workshops and wholesalers can rely on the proven high quality of service and short delivery times via Bosch's established logistics network.

*The Mobility Aftermarket division (MA) provides the aftermarket and repair shops worldwide with modern diagnostic and repair shop equipment and a wide range of spare parts – from new and exchange parts to repair solutions – for passenger cars and commercial vehicles. Its product portfolio includes products made as Bosch original equipment, products developed in-house and specifically manufactured for the aftermarket, as well as services. Around 16,000 associates, as well as a global logistics network, ensure that spare parts reach customers quickly and on time. MA supplies testing and repair-shop technology, diagnostic software, service training, and information services. In addition, the division is responsible for the "Bosch Service" repair-shop franchise, one of the world's largest independent chains of repair-shops, with some 13,000 workshops, and more than 750 "AutoCrew" partners in over 100 countries. In addition, with Bosch Classic, MA supports owners of classic cars with a wide range of spare parts and services.*

*The Bosch Group is a leading global supplier of technology and services. It employs roughly 412,000 associates worldwide (as of December 31, 2025). According to preliminary figures, the company generated sales of 91 billion euros in 2025. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. With its business activities, the company aims to use technology to help shape universal trends such as automation, electrification, digitalization, connectivity, and an orientation to sustainability. In this context, Bosch's broad diversification across regions and industries strengthens its innovativeness and robustness. Bosch uses its proven expertise in sensor technology, software, and services to offer customers cross-domain solutions from a single source. It also applies its expertise in connectivity and artificial intelligence in order to develop and manufacture user-friendly, sustainable products. With technology that is "Invented for life," Bosch wants to help improve quality of life and conserve natural resources. The Bosch Group comprises Robert Bosch GmbH and its roughly 490 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. Bosch's innovative strength is key to the company's further development. At 136 locations across the globe, Bosch employs some 82,000 associates in research and development.*
