

Bosch Expands its DIY Hand Tools Portfolio: **Screwdrivers, Pliers, and practical Sets** Quality Workmanship and Ergonomic Design

April 22, 2026
PI 12088 PT MR

- ▶ Even More Bosch Hand Tools for Ambitious DIYers
- ▶ New to the Range: Practical Sets in Rolling Cases and Backpacks
- ▶ High Quality, Comfortable Handling, and Clever Functions
- ▶ 10-Year Warranty for Registered Hand Tools

Bosch is expanding its hand tool range for DIYers with another 50 new products, bringing the portfolio to over 150 tools by 2026. At the heart of the latest additions are two comprehensive sets: a 119-piece rolling case with a complete equipment selection and a 60-piece smart tool backpack. In addition to these highlights, the expanded range includes new variants of already established tools, such as screwdrivers or pliers, as well as a series of new products with practical functions.

All hand tools stand out due to their user-centered ergonomics. The grip shape, adapted to each application, and the high proportion of soft-grip material ensure that the tools lie comfortably in the hand. All Bosch hand tools are meticulously tested and inspected and are subject to the strict controls of Bosch's quality assurance. Therefore, Bosch grants a 10-year warranty on hand tools after [registration](#).

New in the Bosch Range: Practical Sets in Rolling Cases and Backpacks

In addition to single-category sets, Bosch also offers comprehensive, mixed hand tool sets to its users. Two new sets are particularly noteworthy, as they are comfortable and easy to transport, proving extremely practical for tasks such as helping friends and relatives or carrying out maintenance work: The robust 119-piece rolling case impresses with a wide variety of tools, including screwdrivers, pliers, wrenches, a hammer, and a saw – all carefully sorted by application area.

The smart DIY backpack also stands out as an absolute highlight. It is available individually or as a set with a basic range of tools, making it the perfect mobile solution for all projects, big and small. Thanks to its robust design with a waterproof base, it is also suitable for tougher environments.

New Functions, More Choice: Individuality in the Bosch Range

To enable DIYers to put together their equipment individually and according to their needs, Bosch is expanding existing hand tool segments. Many screwdrivers, files, and rasps are now also available individually, and adjustable wrenches and water pump pliers, for example, come in additional sizes. The offering of new hand tool sets is also growing.

Numerous existing tools have been enhanced with clever additional functions and ideas. For instance, two proven hammers from the Bosch DIY portfolio – the 300g-fitter's hammer and the 450g-claw hammer – can now also be optimized with an included, attachable protective cap. This allows the hammers to be used for furniture assembly and other work on sensitive surfaces. The new file brush, with high-quality carbon steel bristles, helps DIYers keep files clean, ensuring consistently good working results.

The new 39-piece screwdriver set offers an optimal combination of standard screwdrivers, precision screwdrivers, a bit ratchet screwdriver, and stubby bit screwdrivers with matching bits, as well as a magnetizer/demagnetizer, all combined in a practical tool stand. With the magnetizer/demagnetizer, the tips of the screwdrivers can be magnetized, causing screws to stick to the screwdrivers and making them easier to drive.

The new hand tools for DIYers are available immediately. The prices mentioned are recommended retail prices including VAT.

Individual Tools (Selection)	
Engineer's Hammer 300 g with soft bumper, RRP €14.99	<ul style="list-style-type: none"> • High striking efficiency and reduced vibrations due to balanced weight and fiberglass core • Robust, 300g hammer head made from high-quality carbon steel (50-58 HRC). • Attachable soft bumper for working on delicate workpieces

The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, garden tools, power tool accessories and measuring tools. In 2025, its 17,300 associates generated sales approximately 5 billion euros, about 80 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 413,000 associates worldwide (as of December 31, 2025). The company generated sales of 91 billion euros in 2025. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. With its business activities, the company aims to use technology to help shape universal trends such as automation, digitalization, electrification, and artificial intelligence. In this context, Bosch's broad diversification across regions and industries strengthens its innovativeness and robustness. Bosch uses its proven expertise in hardware, software, and services to offer customers cross-domain solutions from a single source. It also applies its expertise in connectivity and artificial intelligence in order to develop and manufacture intelligent, user-friendly, and sustainable products. With technology that is "Invented for life," Bosch wants to help improve quality of life and conserve natural resources. The Bosch Group comprises Robert Bosch GmbH and its roughly 500 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. Bosch's innovative strength is key to the company's further development. Bosch employs some 82,000 associates in research and development.
