

Better visibility thanks to green laser diodes: **Quigo Green cross line laser from Bosch** Easy alignment in all lighting conditions

March 21, 2019
PI 10889 PT MS

- ▶ Precise laser lines also in bright indoor environments
- ▶ More possible applications thanks to extended working range of up to 12 meters
- ▶ New design with proven single-button operation

Green laser lines for maximum visibility indoors: Bosch is expanding its cross line laser range for DIY enthusiasts with a new Quigo model featuring green laser diodes, the Quigo Green. The advantage for the user: Green laser lines are up to four times more visible to the human eye than red laser lines. That makes the Quigo Green's laser lines easy to see also in bright environments, for example near a window facade. In addition, the Quigo Green now provides precise results in a working range of 12 meters – and therefore offers an even wider variety of applications: Correctly positioning curtain rods, leveling kitchen and bathroom cabinets, decorating walls with tiles or patterned wallpaper – with the Quigo Green, do-it-yourselfers can align objects quickly and precisely with an accuracy of ± 0.8 millimeters per meter. The Quigo Green also sets itself apart from previous models with its new design: The handy cube now comes in black with a decorative light-green frame.

Instantly ready to use, easy and intuitive to operate

Of course the Quigo Green still features the proven single-button operation: Just open the protective cover and two intersecting laser lines project an angle of exactly 90 degrees onto the wall. The Quigo Green automatically compensates for irregularities of up to four degrees and signals any deviations from this with a flashing laser line. This is, for example, the case when do-it-yourselfers use the tilt function to align diagonal patterns, lines or railings. If the protective cover is closed, the device switches off immediately and the internal pendulum is stopped ready for transport.

Flexible positioning for a wide range of applications

The universal clamp is included with the Quigo Green as standard, and it allows the device to be easily fixed to table tops, ladders, shelves or even stair railings. This is made particularly easy by the adapter plate, which also features fine adjustment in a range of ± 2 centimeters, making it unnecessary to frequently readjust the universal clamp. The adapter plate can be fixed to the top, bottom or rear of the Quigo Green, providing do-it-yourselfers even more flexibility: It could be positioned directly beneath the ceiling, for instance, for marking out a border. Furthermore, the adapter plate can also be attached to a standard tripod with a $\frac{1}{4}$ -inch thread.

The Quigo Green is available from April 2019. All prices are recommended retail prices including VAT.

Specifications	Quigo Green
Laser diode/Laser class	500 – 540 nm/2
Working range	12 m
Leveling accuracy	± 0.8 mm/m
Leveling time	6 s
Self-leveling range	$\pm 4^\circ$
Tilt function	Yes
Power supply	2 x 1.5 V LR03 (AAA)
Dimensions (length x width x height)	65 x 65 x 65 mm
Weight including batteries	270 g
Scope of delivery/recommended retail price including VAT	Tool including MM2 universal clamp, adapter plate and batteries: €79.99

Subject to change.

The Robert Bosch Power Tools GmbH, a division of the Bosch Group, is one of the world's leading providers for power tools, power tool accessories and measuring tools. In 2018, its roughly 20,000 associates generated sales of 4.6 billion euros, about 85 percent of which outside of Germany. With brands such as Bosch and Dremel, the division stands for customer focus and great engineering progress. The core success factors are innovative strength and pace of innovation. In 2019, Bosch Power Tools will again launch more than 100 new products onto the German market in its four business segments power tools, accessories, measuring tools and garden tools.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 410,000 associates worldwide (as of December 31, 2018). According to preliminary figures, the company generated sales from operations of 77.9 billion euros in 2018. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT company, Bosch offers innovative solutions for smart homes, smart cities, connected mobility, and connected manufacturing. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to deliver innovations for a connected life. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis for the company's future growth is its innovative strength. At 125 locations across the globe, Bosch employs some 69,500 associates in research and development.
