

Add-on for EPS 708 and EPS 815 diesel test benches **New test kits for the inspection of VDO common-rail pumps on Bosch diesel test benches**

December 2017

PI 9879 AA Dr

- ▶ Improved and more flexible utilization of Bosch diesel test benches
- ▶ Access to test plans for VDO pumps via access code
- ▶ Diesel experts from Bosch and VDO ensure high repair quality

Bosch has improved the scope of application of its diesel test benches allowing an even more flexible use and increased utilization. Authorized diesel experts equipped with Bosch EPS 708 and EPS 815 diesel test benches can now also test and maintain common-rail pumps by the Continental brand VDO thanks to two newly developed test kits. Depending on already existing workshop equipment, there are two different test kits available. CP VDO retrofit kit is designed for those workshops equipped with Bosch EPS 708 or EPS 815 diesel test benches and CP1, CP3, CP4 and CP third party test kits. The CP VDO Complete kit, however, only requires the Bosch CP4 test kit. Having been developed by both Bosch and VDO in close cooperation, the new test kits are approved by VDO for CR pumps.

Bosch provides the test plans including test values for VDO pumps on the TestData CD for EPS 708 and EPS 815. In order to unlock these data, an access code is required, which is only available for VDO Diesel Repair Service (DRS) Partners. This code has a validity of one year and can be ordered again once it expired. VDO provides the repair instructions as well as the spare parts required for pump repairs.

Authorization for workshops

By means of the authorization, VDO assures only workshops with both the necessary equipment, the required know-how and original spare parts will test and maintain VDO pumps. Wholesalers can provide interested workshops with more information about the DRS partner concept.

The Automotive Aftermarket division (AA) provides the aftermarket and repair shops worldwide with a complete range of diagnostic and repair shop equipment and a wide range of spare parts – from new and exchange parts to repair solutions – for passenger cars and commercial vehicles. Its product portfolio includes products made as Bosch original equipment, as well as aftermarket products and services developed and manufactured in-house. About 18,000 associates in 150 countries, as well as a global logistics network, ensure that some 650,000 different spare parts reach customers quickly and on time. In its “Automotive Service Solutions” operations, AA supplies testing and repair-shop technology, diagnostic software, service training, and information services. In addition, the division is responsible for the “Bosch Service” repair-shop franchise, one of the world’s largest independent chains of repair-shops, with some 17,000 workshops. In addition, AA is responsible for more than 1,000 “AutoCrew” partners.
