

Comprehensive extension of the Bosch FILTER+ range of high-performance cabin filters

The right filter for every need

February 2018
PI 10022 AA Kr

- ▶ High market coverage of cabin filters for almost any vehicle
- ▶ New FILTER+ effectively protects allergy sufferers
- ▶ Fitting instructions included for easy fitting

Within the Bosch range, FILTER+ is a particularly powerful cabin filter. It does not only separate smallest particles and foul smells, but also bacteria and allergens. Bosch now significantly expanded the FILTER+ range from 30 to 40 part numbers. In Europe, some 150 million vehicles can now be equipped with these new filters. Every year, the complete Bosch range of cabin filters, consisting of standard filters, activated-carbon filters and the new FILTER+, is expanded by some 40 new types. Currently comprising some 500 part numbers, it includes a matching cabin filter for almost any type of vehicle and suitable for every need.

Separating allergens, bacteria, smells and smallest particles

More and more people are allergic to pollen. Causing symptoms such as itching, sneezing or hay fever, this allergy is particularly annoying in springtime. Driving a car while suffering allergic reactions can result in dangerous situations. After all, a sneezing driver is a blind driver – at least for a moment. Bosch FILTER+ protects allergy sufferers against flying pollen. Its multiple functional filter layers ensure clean air inside the cabin. An anti-allergy layer with a special molecular grid structure lastingly separates allergens and renders them harmless. In addition, this filter layer also eliminates bacteria. An activated-carbon layer neutralizes harmful and foul-smelling gases. And finally, the ultra-thin microfiber layer separates 99 percent of all particles with a diameter of 2.5 micrometers. Filtered in this manner by FILTER+, the air inside the cabin is both clean and free of smells.

For easy fitting, each filter comes with fitting instructions which can also be accessed online scanning the QR code on the packaging. In order to maintain

high air quality inside the vehicle, car drivers should have their cabin filters replaced regularly and by high-performance products. Bosch recommends replacing cabin filter once a year or every 15,000 km.

The Automotive Aftermarket division (AA) provides the aftermarket and repair shops worldwide with a complete range of diagnostic and repair shop equipment and a wide range of spare parts – from new and exchange parts to repair solutions – for passenger cars and commercial vehicles. Its product portfolio includes products made as Bosch original equipment, as well as aftermarket products and services developed and manufactured in-house. About 18,000 associates in 150 countries, as well as a global logistics network, ensure that some 650,000 different spare parts reach customers quickly and on time. In its “Automotive Service Solutions” operations, AA supplies testing and repair-shop technology, diagnostic software, service training, and information services. In addition, the division is responsible for the “Bosch Service” repair-shop franchise, one of the world’s largest independent chains of repair-shops, with some 17,000 workshops. In addition, AA is responsible for more than 1,000 “AutoCrew” partners.
