

The Bosch Smart Home Eyes Outdoor Camera – Full HD by day and night

Best possible security at any time of day

04. September 2019

PI 11008 HOME CT

- ▶ **Stylishly combined:** sophisticated combination of security solution and atmospheric outdoor lighting in an attractive design
- ▶ **Everything in view:** full-HD video footage in colour – even at night – as well as live notifications and live streaming in the Bosch Smart Camera App
- ▶ **More security:** video recordings are triggered by movements and now also by sounds
- ▶ **Better overview:** clear and comprehensible display of all new camera functions in the app
- ▶ **Easier to use:** option of filtering by date, sounds and movements

Stuttgart/Berlin. What happens at home while I'm away and how do I keep an overview of it? With the smart Eyes outdoor camera from Bosch Smart Home, the user knows around the clock who is in front of his door – even in the middle of the night or when the resident is away from home.

The device combines a security solution and stylish outdoor lighting. This enables the camera to shoot excellent, high-quality, colour videos in outstanding image quality (full-HD video quality with 1,080p) even in the dark. Recorded images of people are optimally visible – both during live viewing and afterwards when recorded video footage is played back. The outdoor camera simultaneously provides the home with atmospheric, individually adjustable, outdoor lighting: for example, it can be set to switch on at dusk and off again at another predefined time. Front and facade lights can be selected separately. Irrespective of this, the front luminaire switches on whenever movement is detected, provided the motion light is activated. Microphone and loudspeaker support two-way communication (listening and speaking) with people who are within range of the camera – via app from anywhere in the world.

Intelligent event detection

Thanks to sensitive event detection, the camera does not react to moving trees or passing small animals. This means that only those events are automatically recorded which are actually significant, thus minimizing the number of false alarms. In addition to being activated by the intelligent motion sensors, the

camera now also activates as soon as the sensitive microphones detect unusual sounds. All events are immediately forwarded to the smartphone and can be viewed live or as recordings – anytime and anywhere in the world. The recorded and encrypted videos are stored on the camera and can be viewed only by the owner. The app can also be used to give friends or acquaintances access to the camera so they can keep a watchful eye on a vacant home while its residents are away. For example, the authorization can be user-defined for the duration of a holiday. The temporary access automatically expires on a pre-determined date, for example, the anticipated homecoming date.

The improved design of the app also offers new interactive possibilities. This makes it easy to categorize and filter events: video recordings captured today or yesterday, triggered by movements or sounds, and much more. If the camera is temporarily unavailable or has been stolen, the material is cached in the Bosch cloud.

Securely installed

For operation, the Bosch Smart Home Eyes outdoor camera must be connected to the power supply and WLAN. Thanks to its integrated lighting, it can be set up wherever outdoor lighting is installed. This means that no additional wiring is required. Installation begins by attaching a mounting plate, to which the cables are connected. The camera can be plugged onto the mounting plate within a few seconds and is then immediately ready for operation. Thanks to the simplicity of adjusting the camera's viewing angle, the camera can be attached to any house wall and aimed accordingly. In addition, relevant areas (e.g. zones located outside the private property) can easily be excluded from the camera detection in the app. The app guides the user through a simple installation process, which is simplified by clear, animated instructions. A unique QR code is generated and held in front of the camera. This securely transfers the network ID, WLAN password and security token to the camera.

The Bosch Smart Camera App can control up to ten indoor or outdoor cameras and can preset various camera scenarios. All installed cameras are then displayed on the home screen. The app now also displays an overview of all new camera functions so users can discover them better and more easily. The Bosch Smart Camera App is available for Android and iOS.

Availability

Since mid-2017. Germany, Austria, France and Great Britain.

Recommended retail price

Bosch Smart Home Eyes outdoor camera: €349.95

Robert Bosch Smart Home GmbH was founded as a wholly-owned subsidiary of Robert Bosch GmbH. Based in Stuttgart-Vaihingen, the company offers intelligent solutions for retail customers who desire a networked home from a single source. Bosch Smart Home simplifies home living by unobtrusively controlling routine activities in the background. It offers greater comfort, convenience, security and energy efficiency.

More information is available at www.bosch-smarthome.com.

The Bosch Group is a leading international technology and service company with approximately 402,000 associates worldwide (as of 31 December 2017). It generated sales totalling 78.1 billion euros in fiscal 2017. Its activities are divided into four business segments: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading provider in the Internet of Things (IoT), Bosch offers innovative solutions for Smart Home, Smart City, Connected Mobility, and Industry 4.0. With its expertise in sensors, software and services, as well as its own IoT cloud, the company is able to offer its customers networked and cross-domain solutions from a single source. The strategic goal of the Bosch Group is to provide solutions for connected living. With innovative and inspiring products and services, Bosch improves the quality of people's lives around the world. Bosch offers "technology for life". The Bosch Group comprises Robert Bosch GmbH and its approximately 440 subsidiaries and regional companies in 60 countries. Including trade and service partners, Bosch's worldwide manufacturing, development and sales network covers almost every country around the globe. The company's innovative strength is the basis for its future growth. Bosch employs around 64,500 associates worldwide in research and development at 125 locations.

The company was founded in Stuttgart in 1886 by Robert Bosch (1861-1942) as the "Workshop for Precision Mechanics and Electrical Engineering". The corporate structure of Robert Bosch GmbH ensures the entrepreneurial independence of the Bosch Group. It enables the company to plan for the long term and to invest in significant advance outlays for the future. The non-profit Robert Bosch Stiftung GmbH holds 92% of the capital shares of Robert Bosch GmbH. The majority of voting rights are held by Robert Bosch Industrietreuhand KG, which exercises the entrepreneurial shareholder function. The remaining shares are held by the Bosch family and Robert Bosch GmbH.
